La chatte semble être bloquée
dans cet abîme de neige.

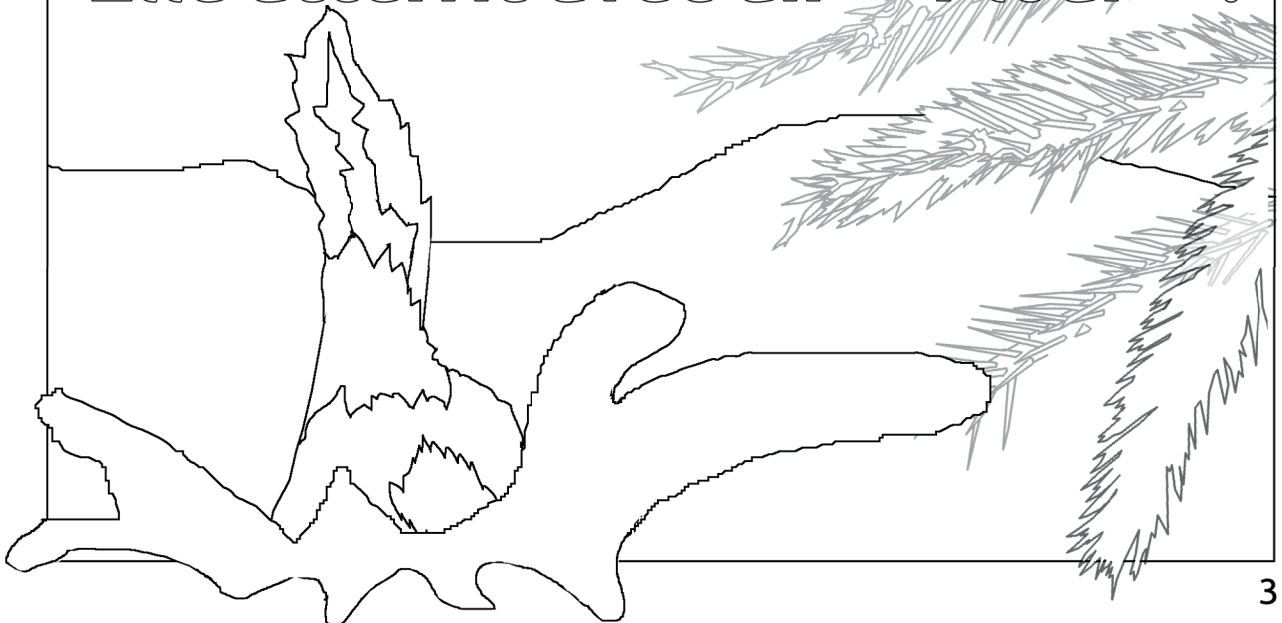

Des petites raquettes de chats
l'aideraient dans cette
nouvelle aventure !

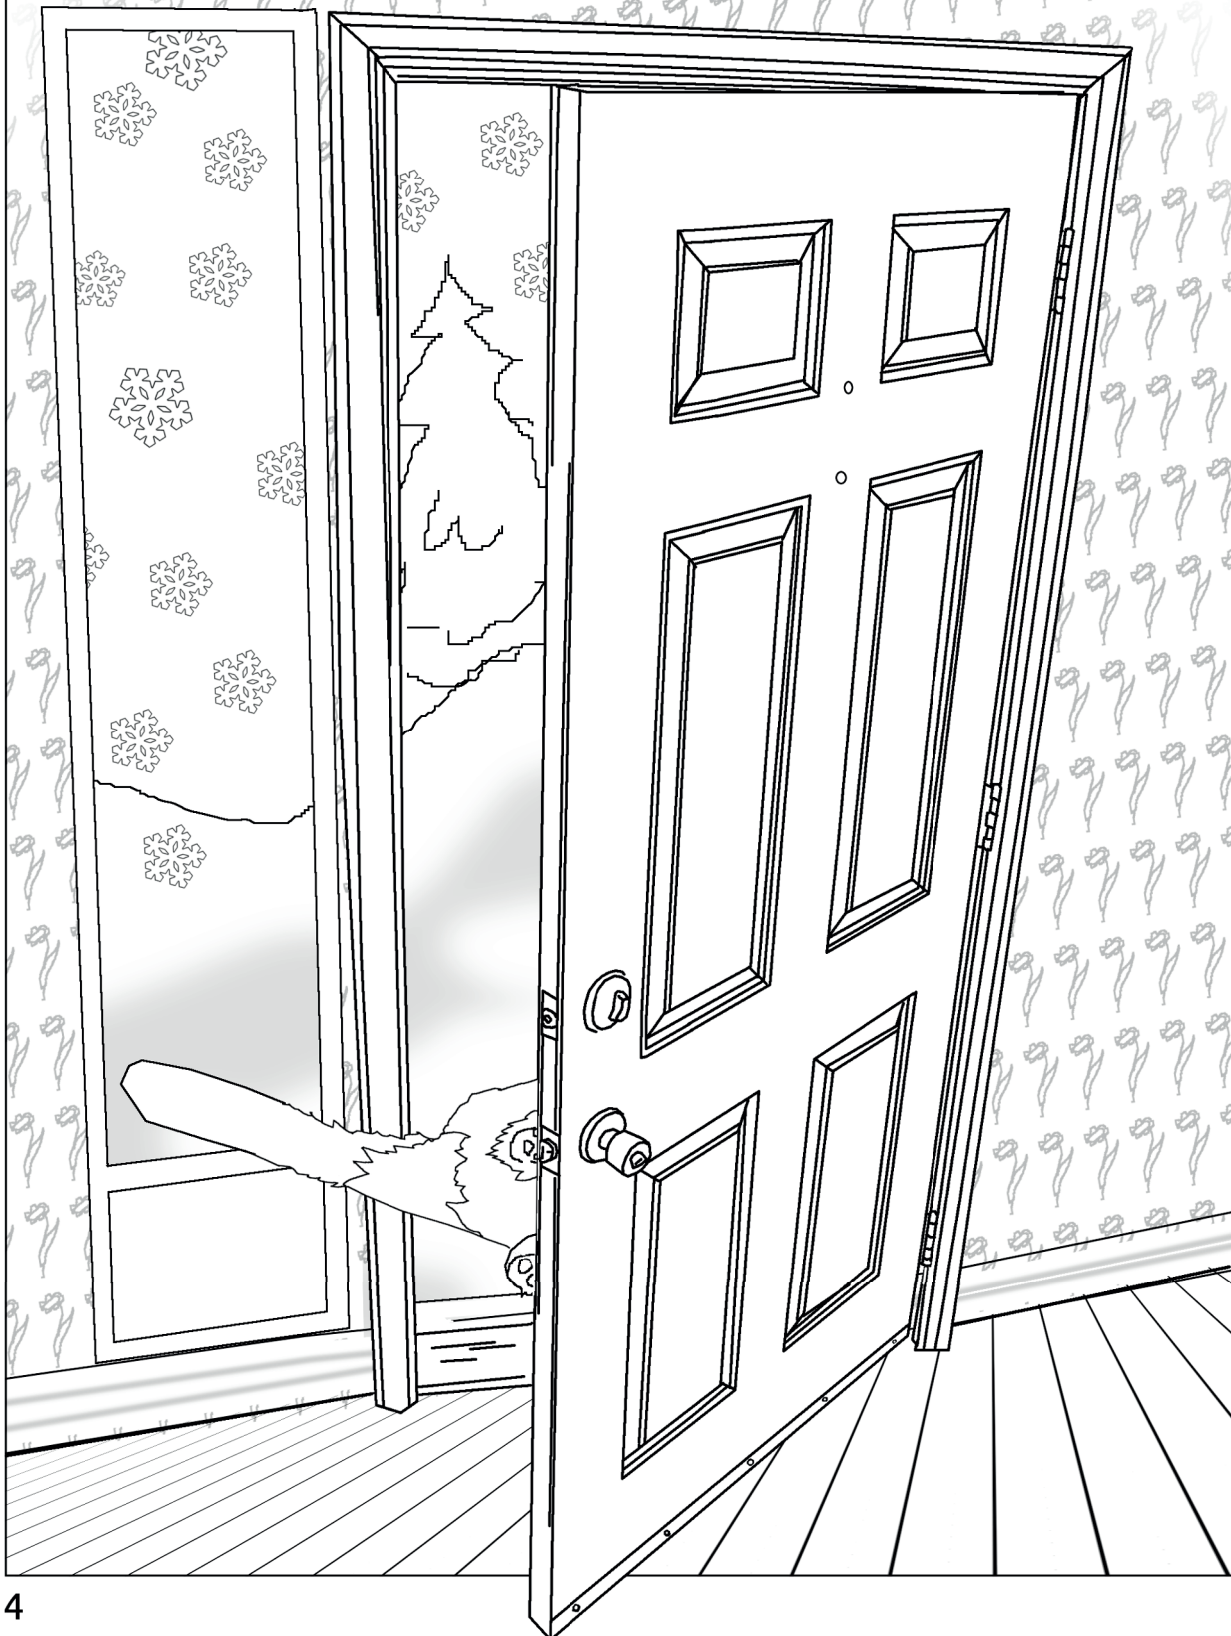

Sans ça, elle s'enfonce
jusqu'à son ventre

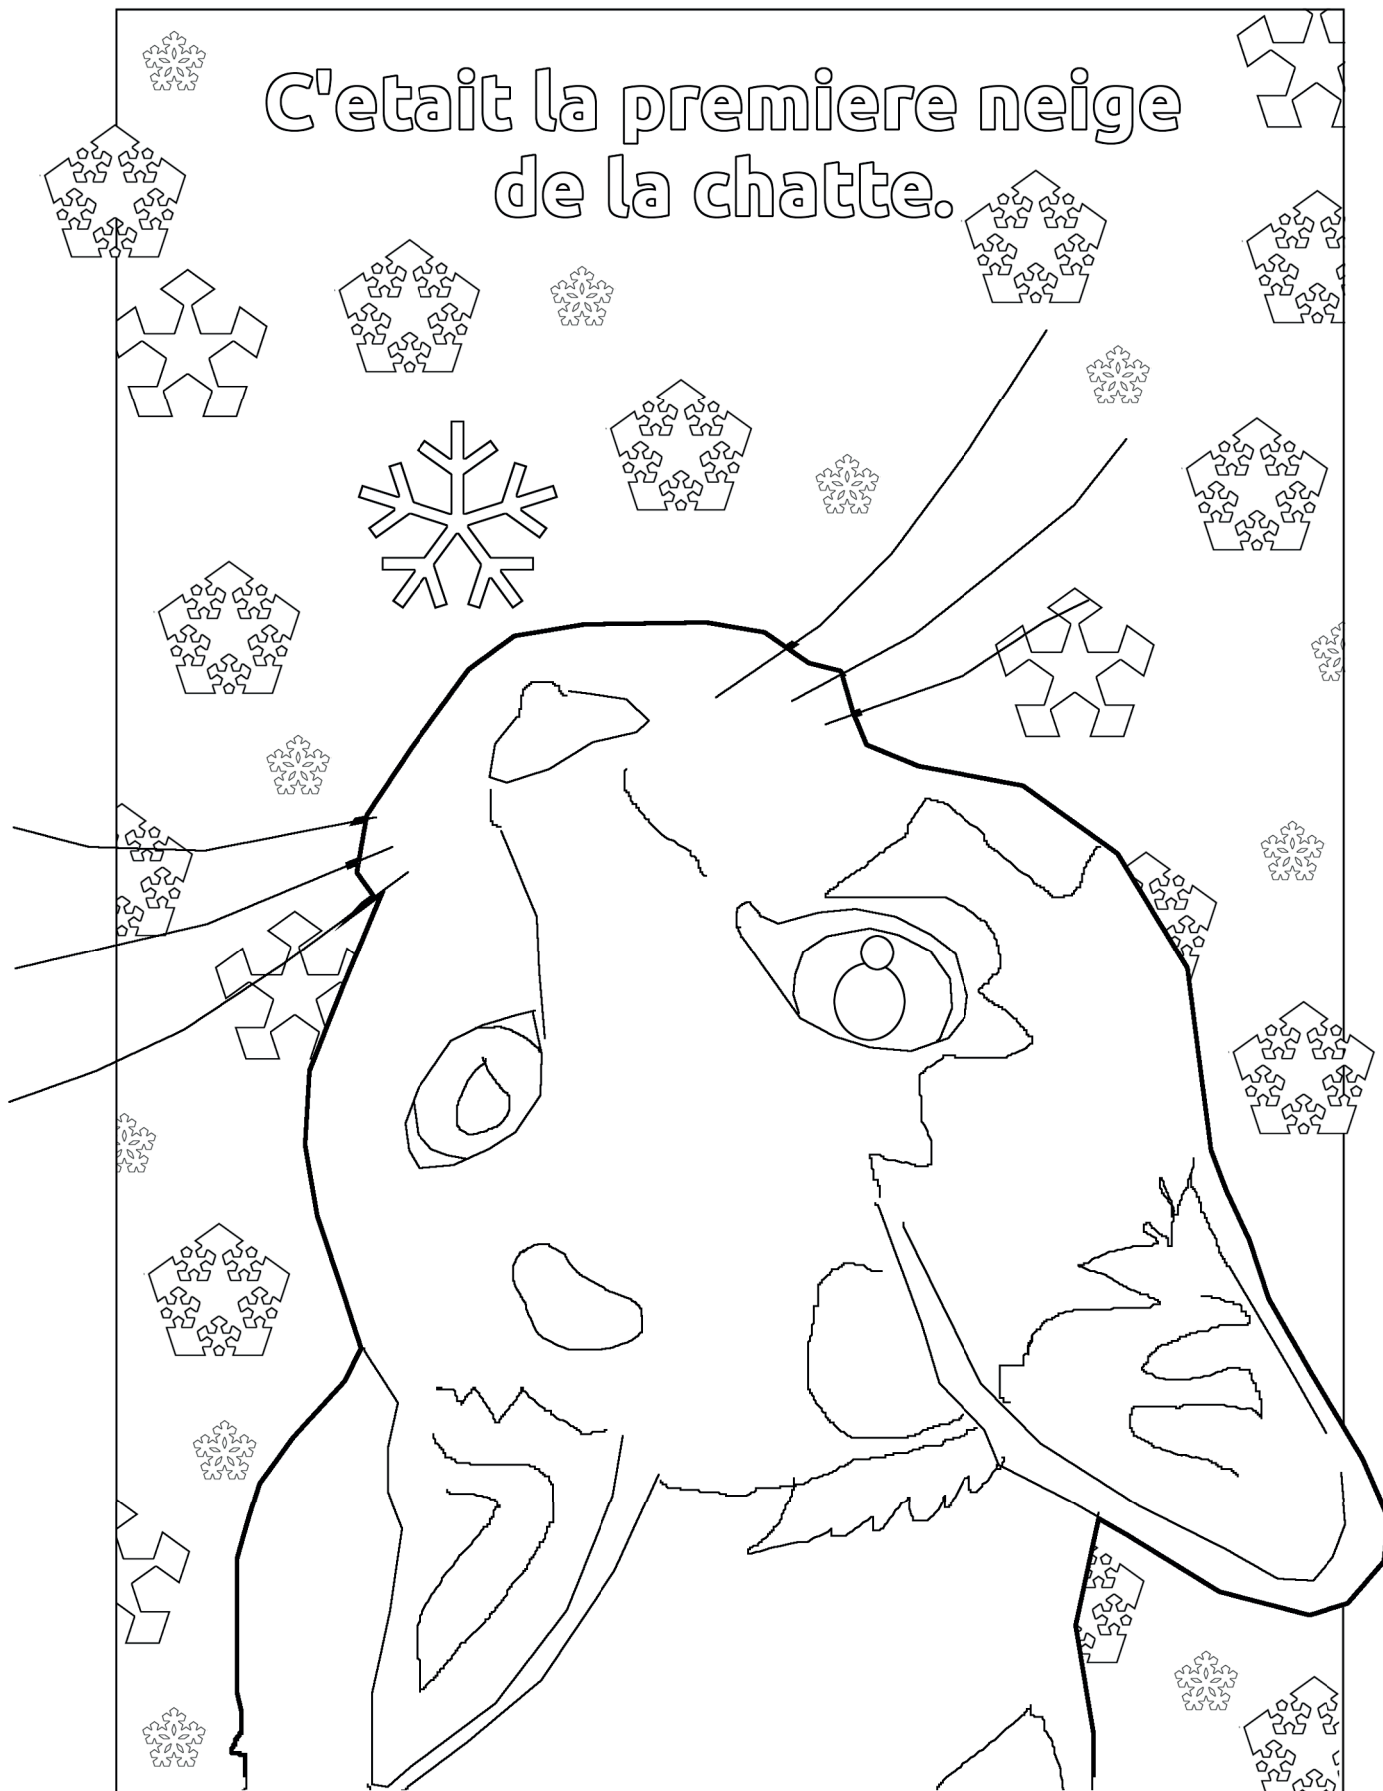

à chaque saut qu'elle fait
elle fait voler la neige.
Elle atterrit avec un <<Plouf>>.

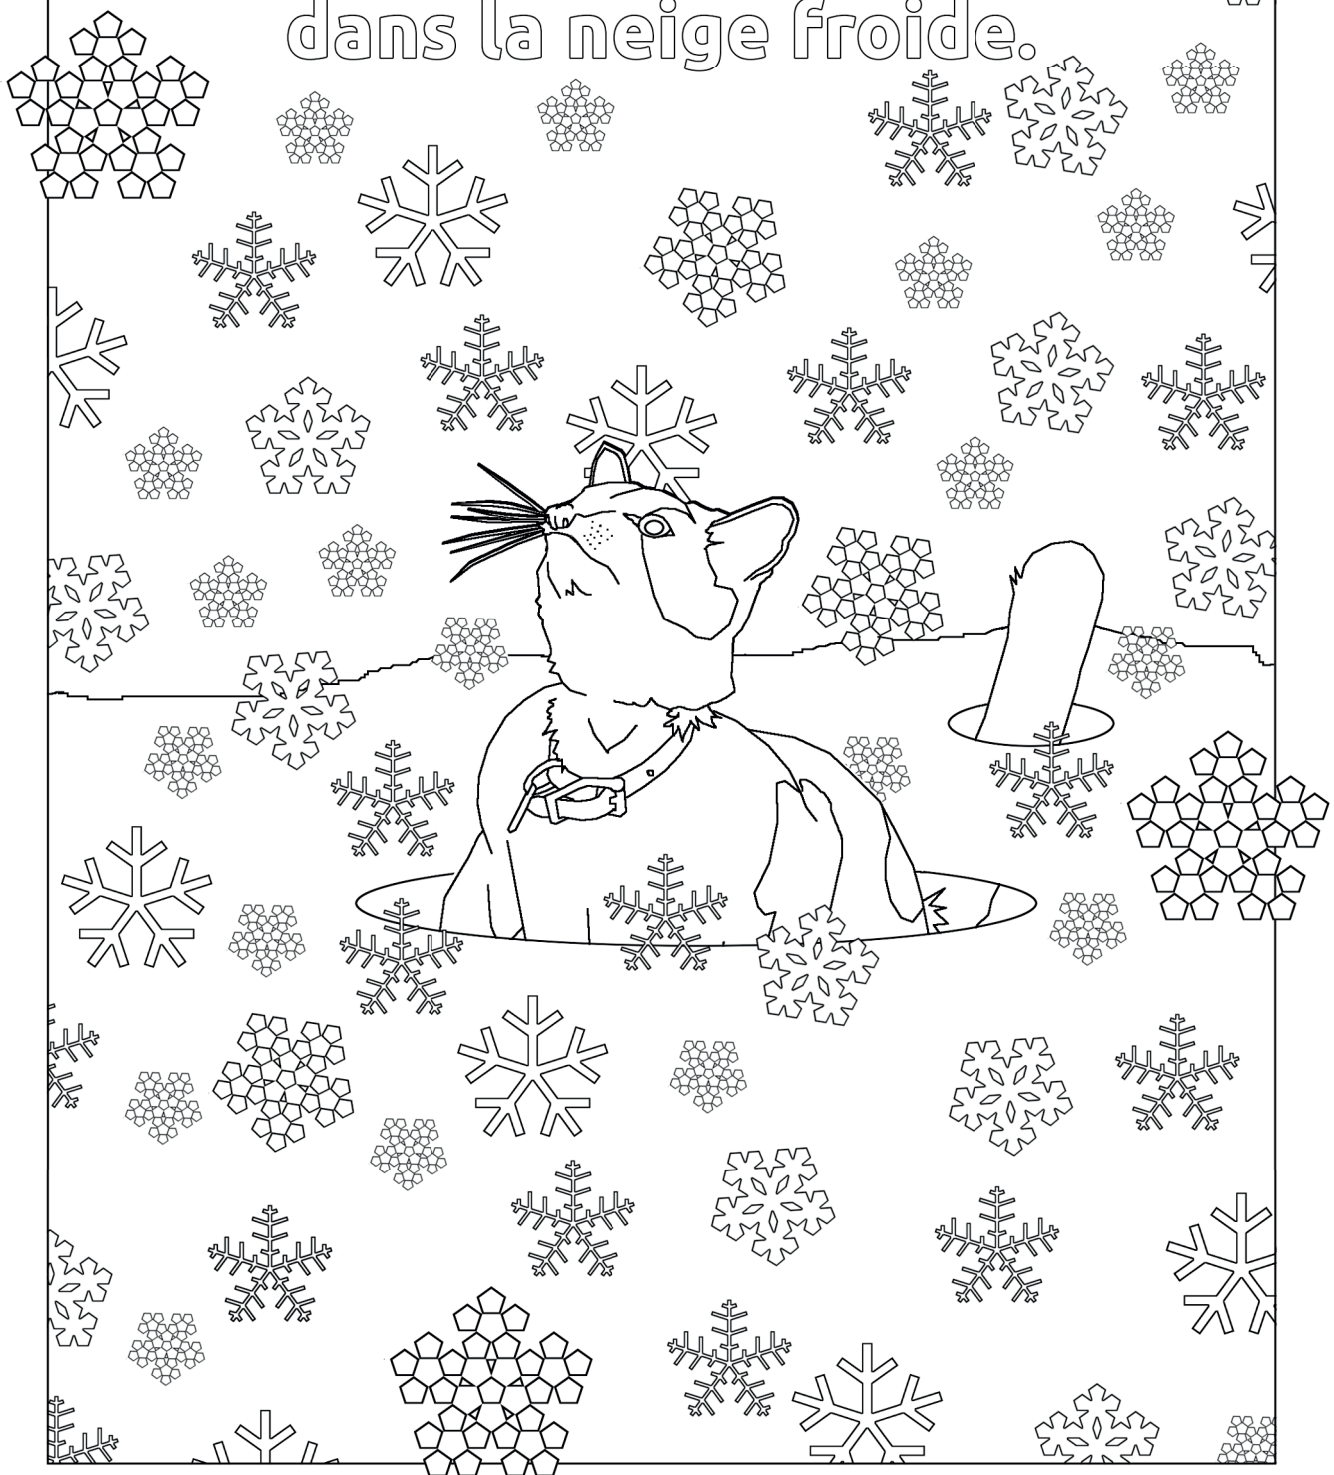

J'ai pourtant essayé de l'arrêter.
Mais elle a filé vers la porte.

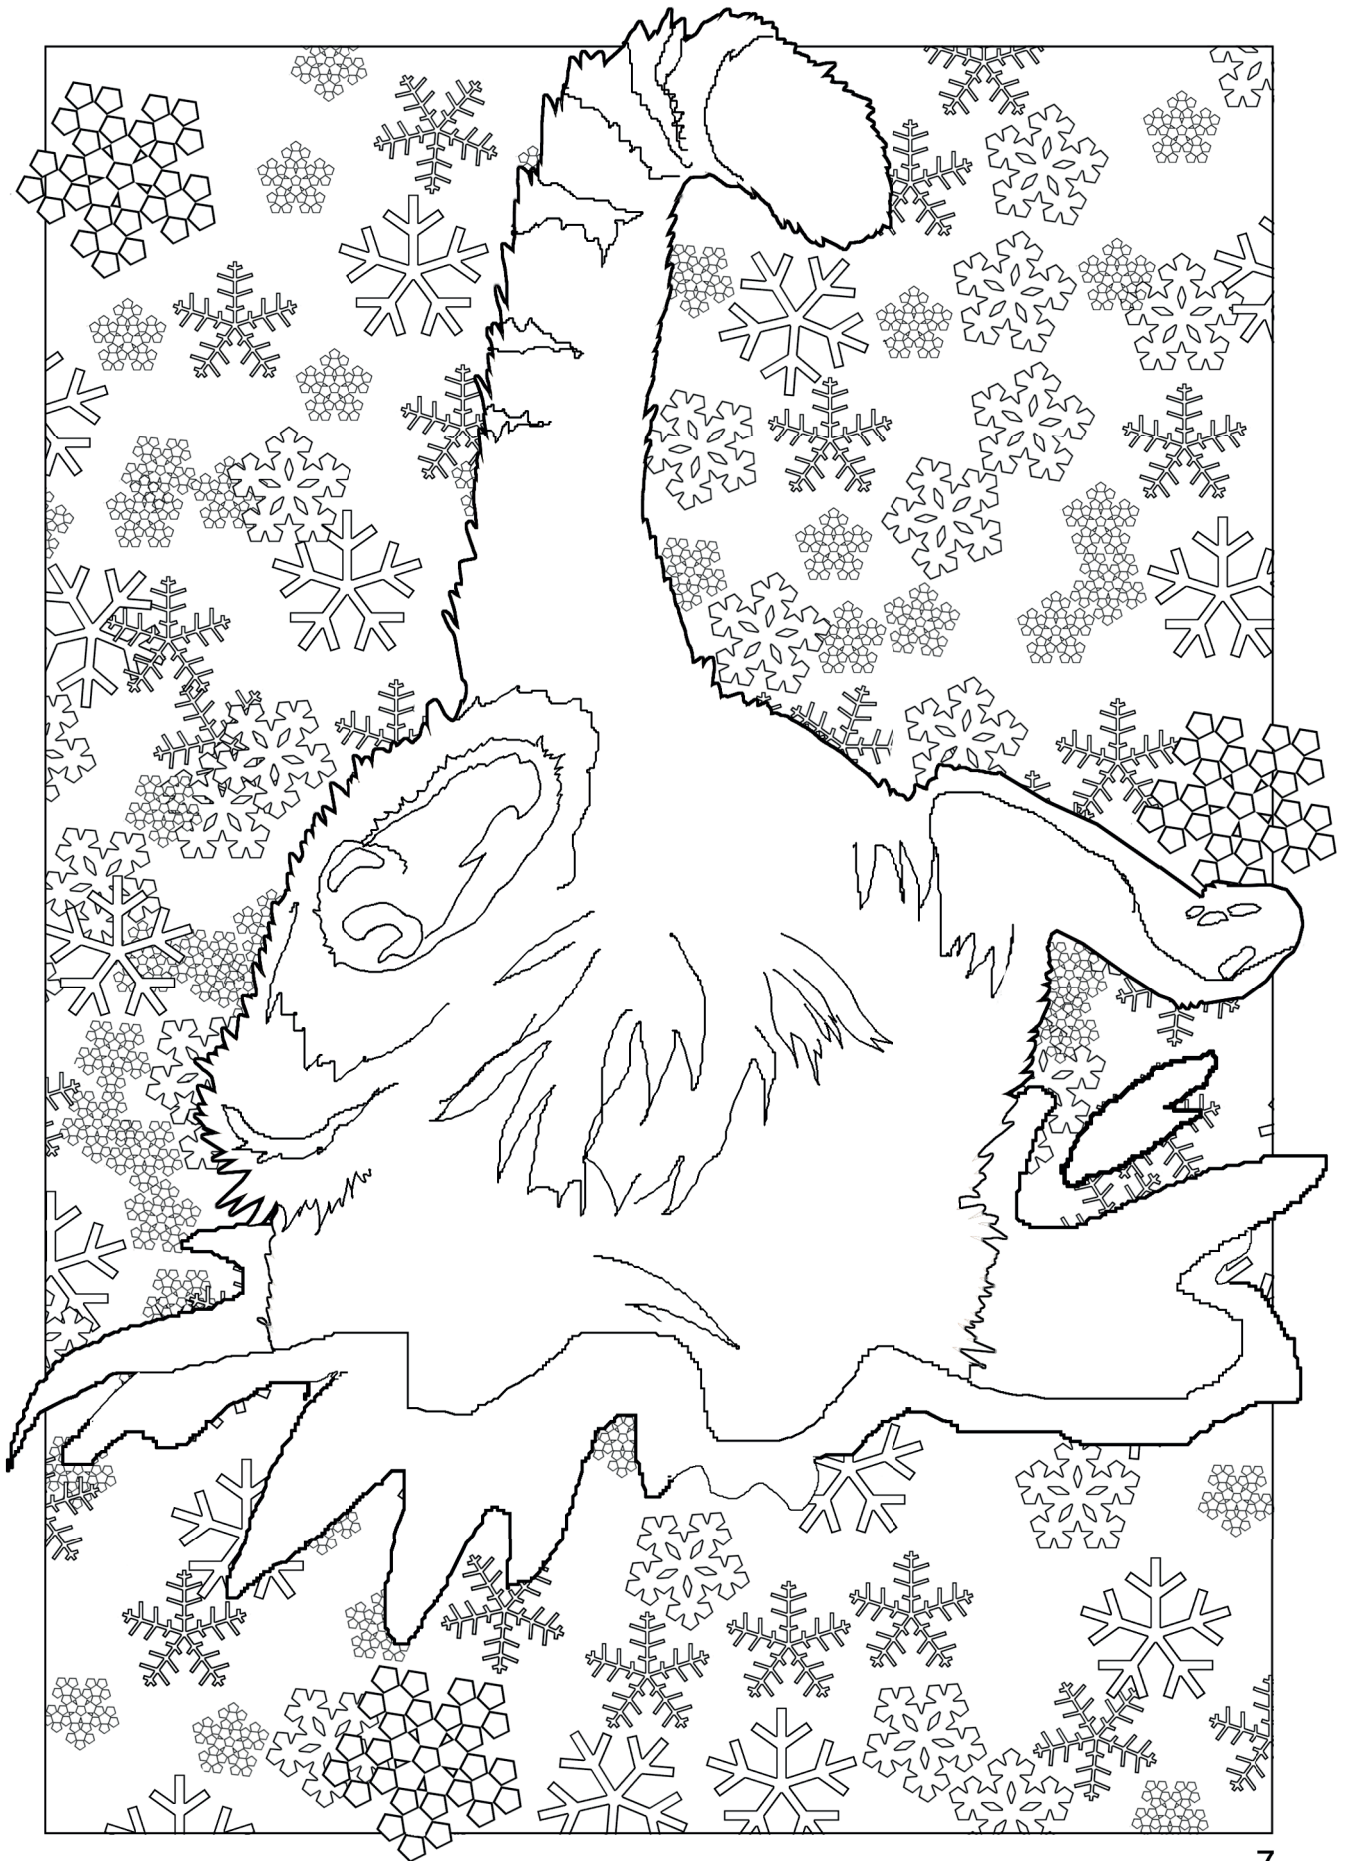

C'etait la premiere neige
de la chatte.

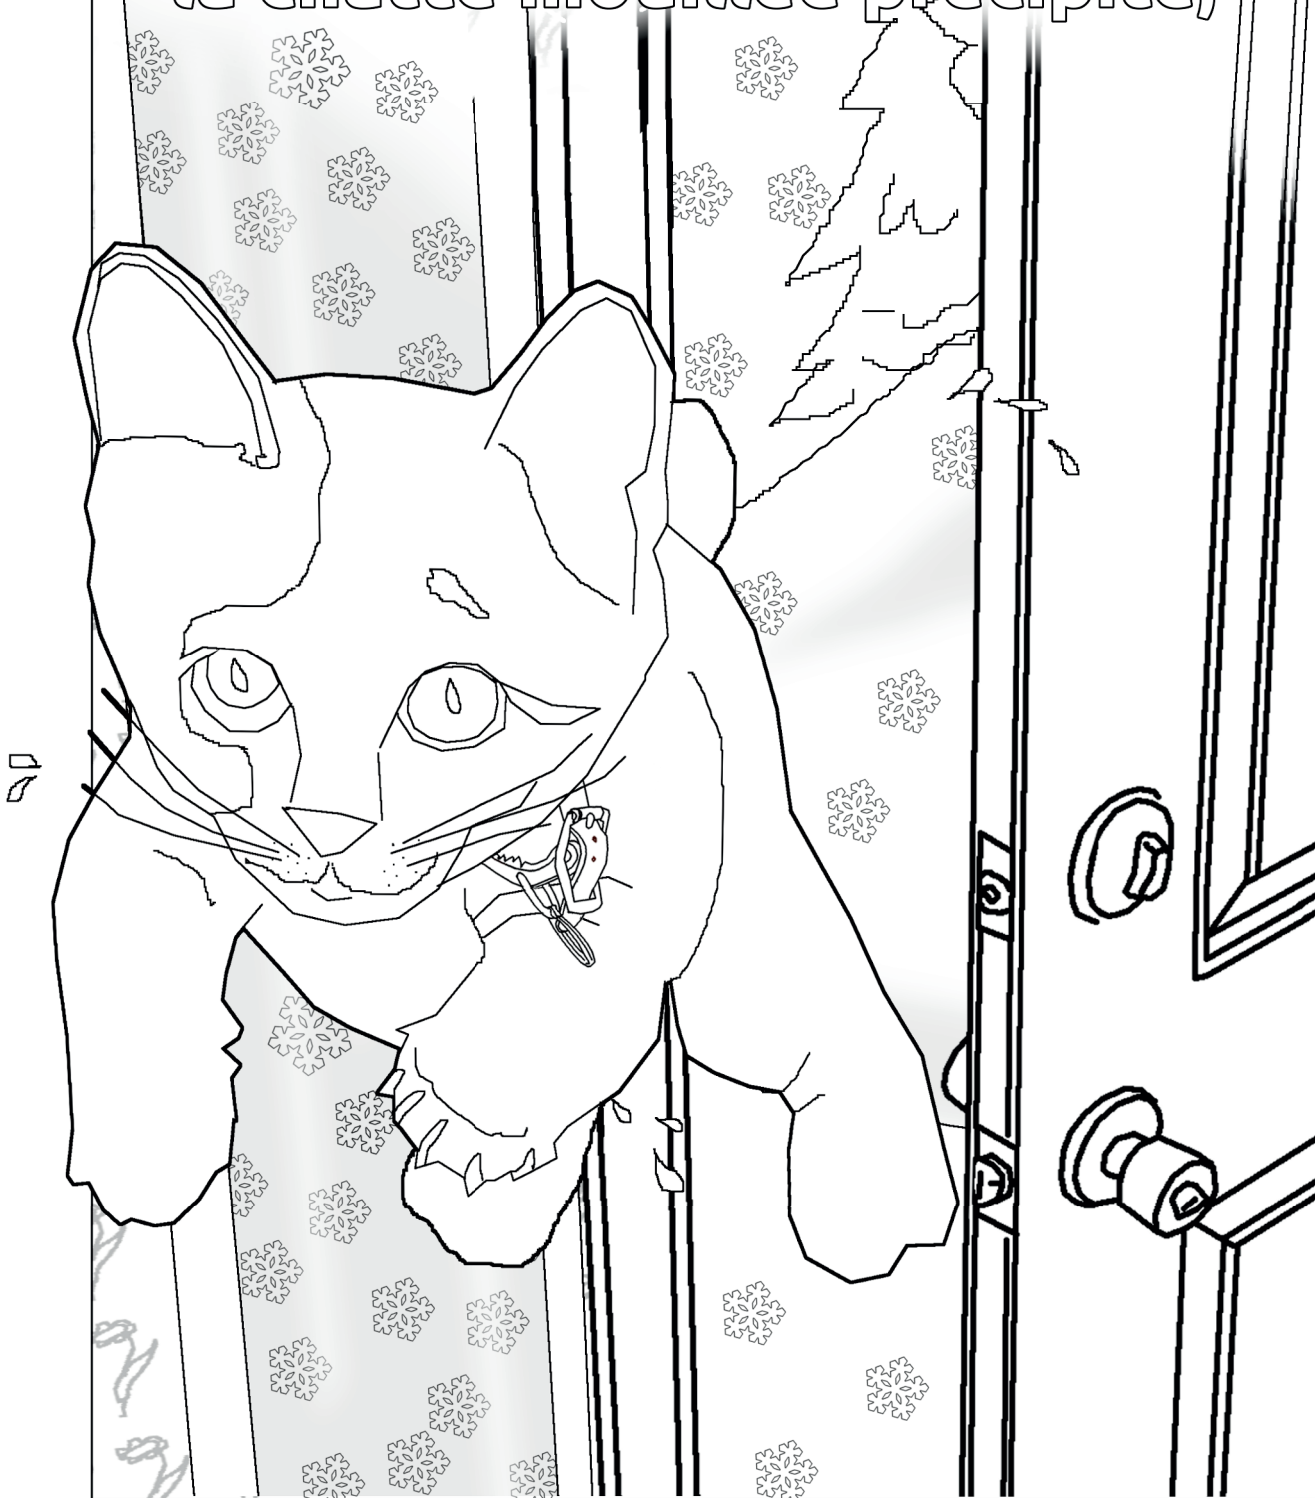

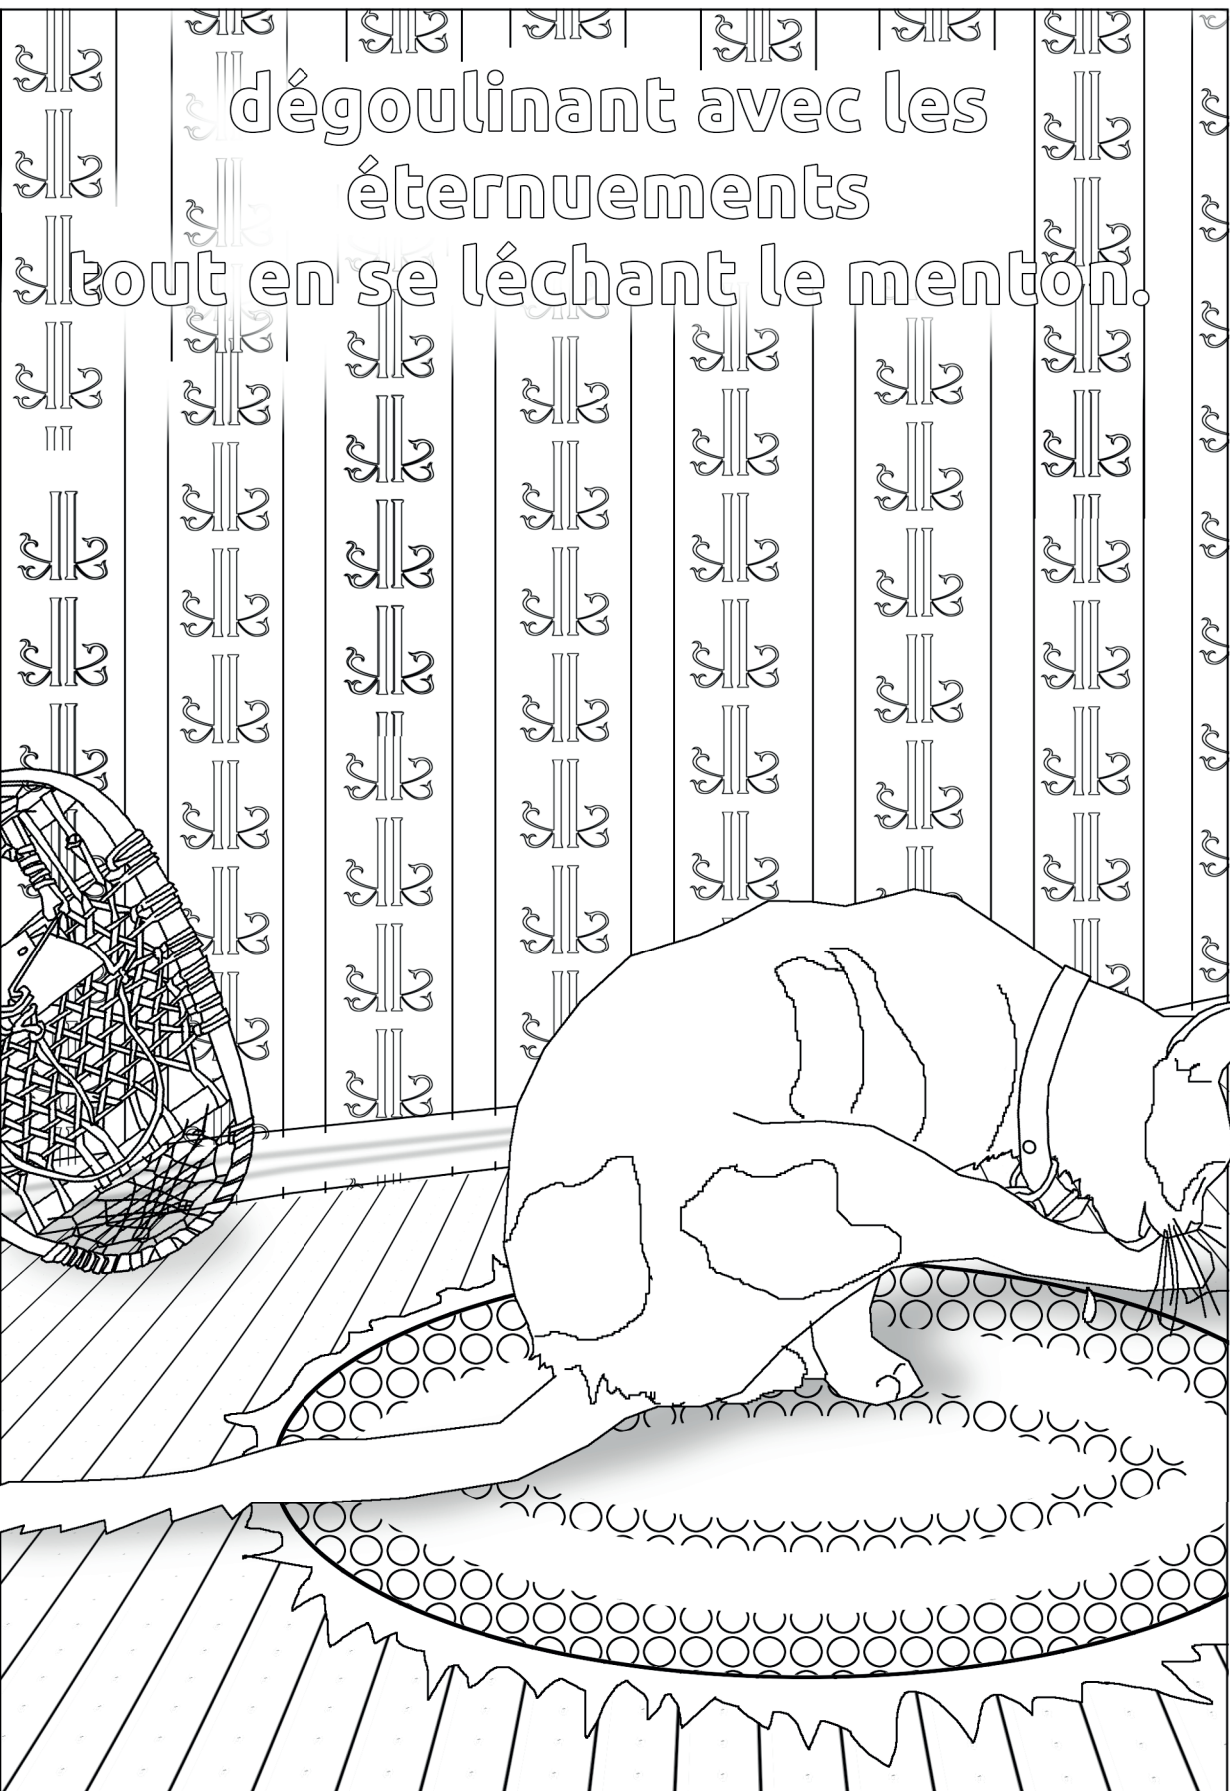

Maintenant, elle découvre que
le pire endroit est à l'extérieur
d'une maison chaleureuse :
dans la neige froide.

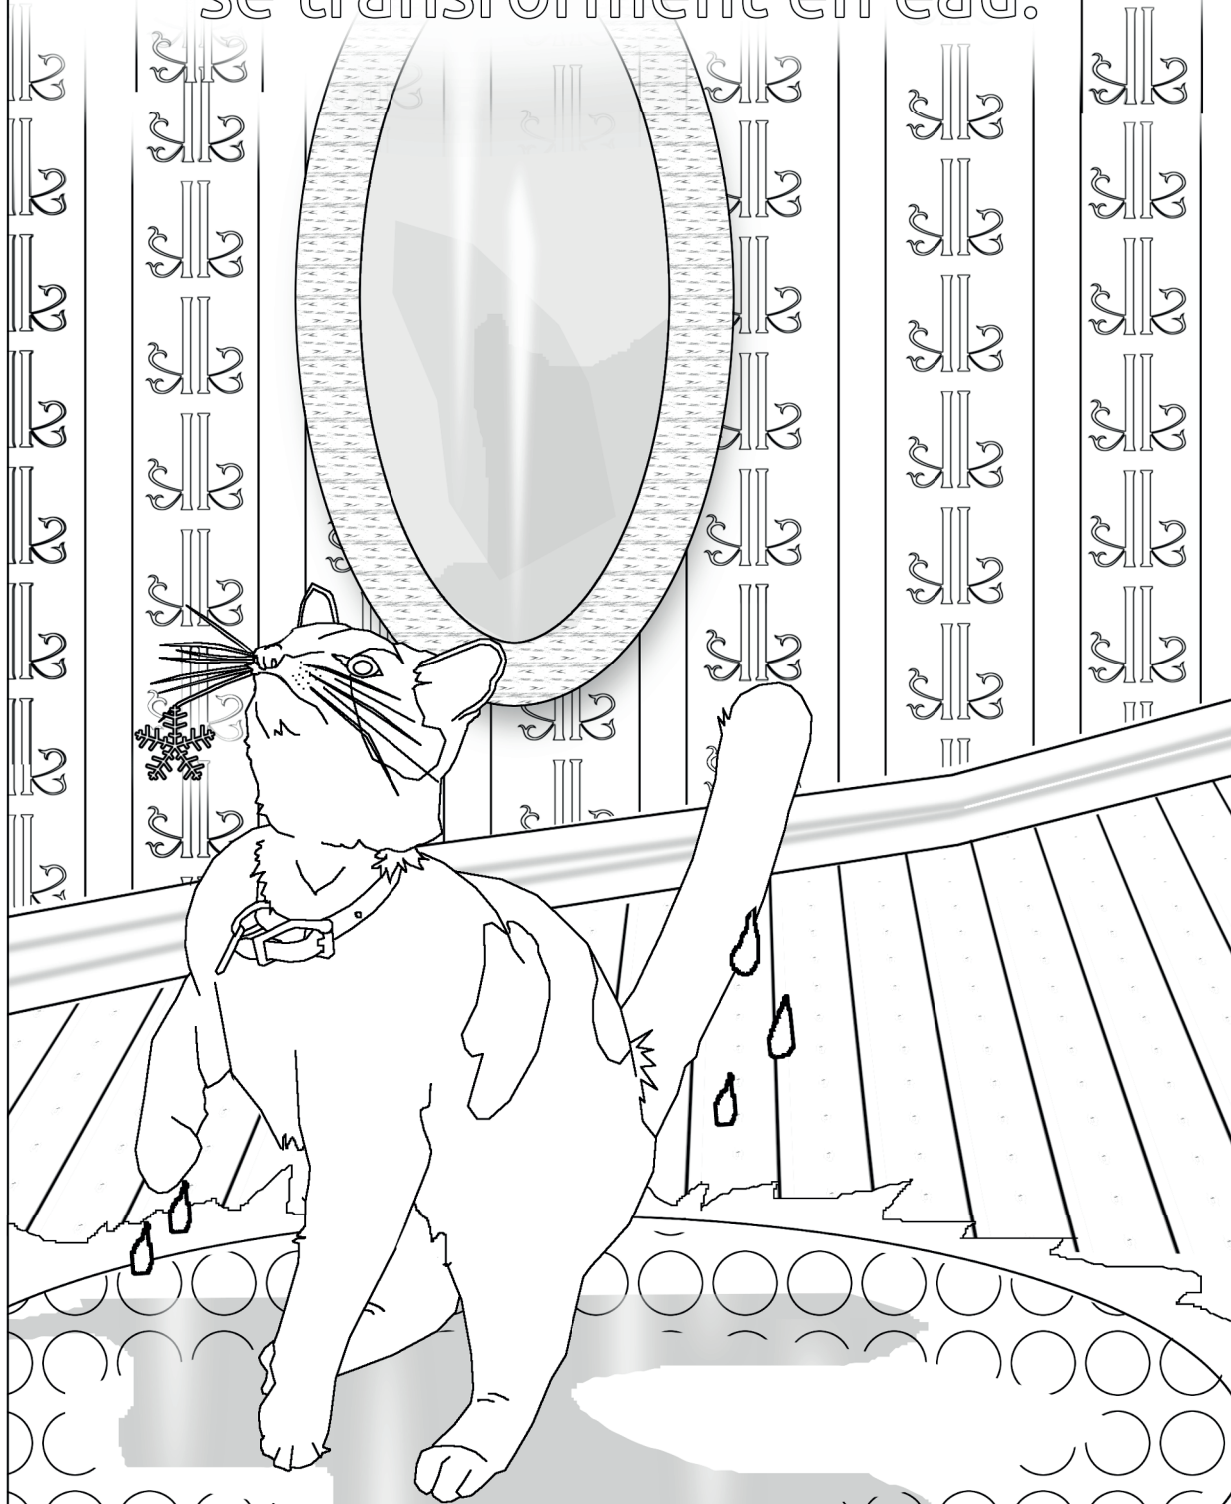

Donc, comme une tempête
de neige
la chatte mouillée précipite,

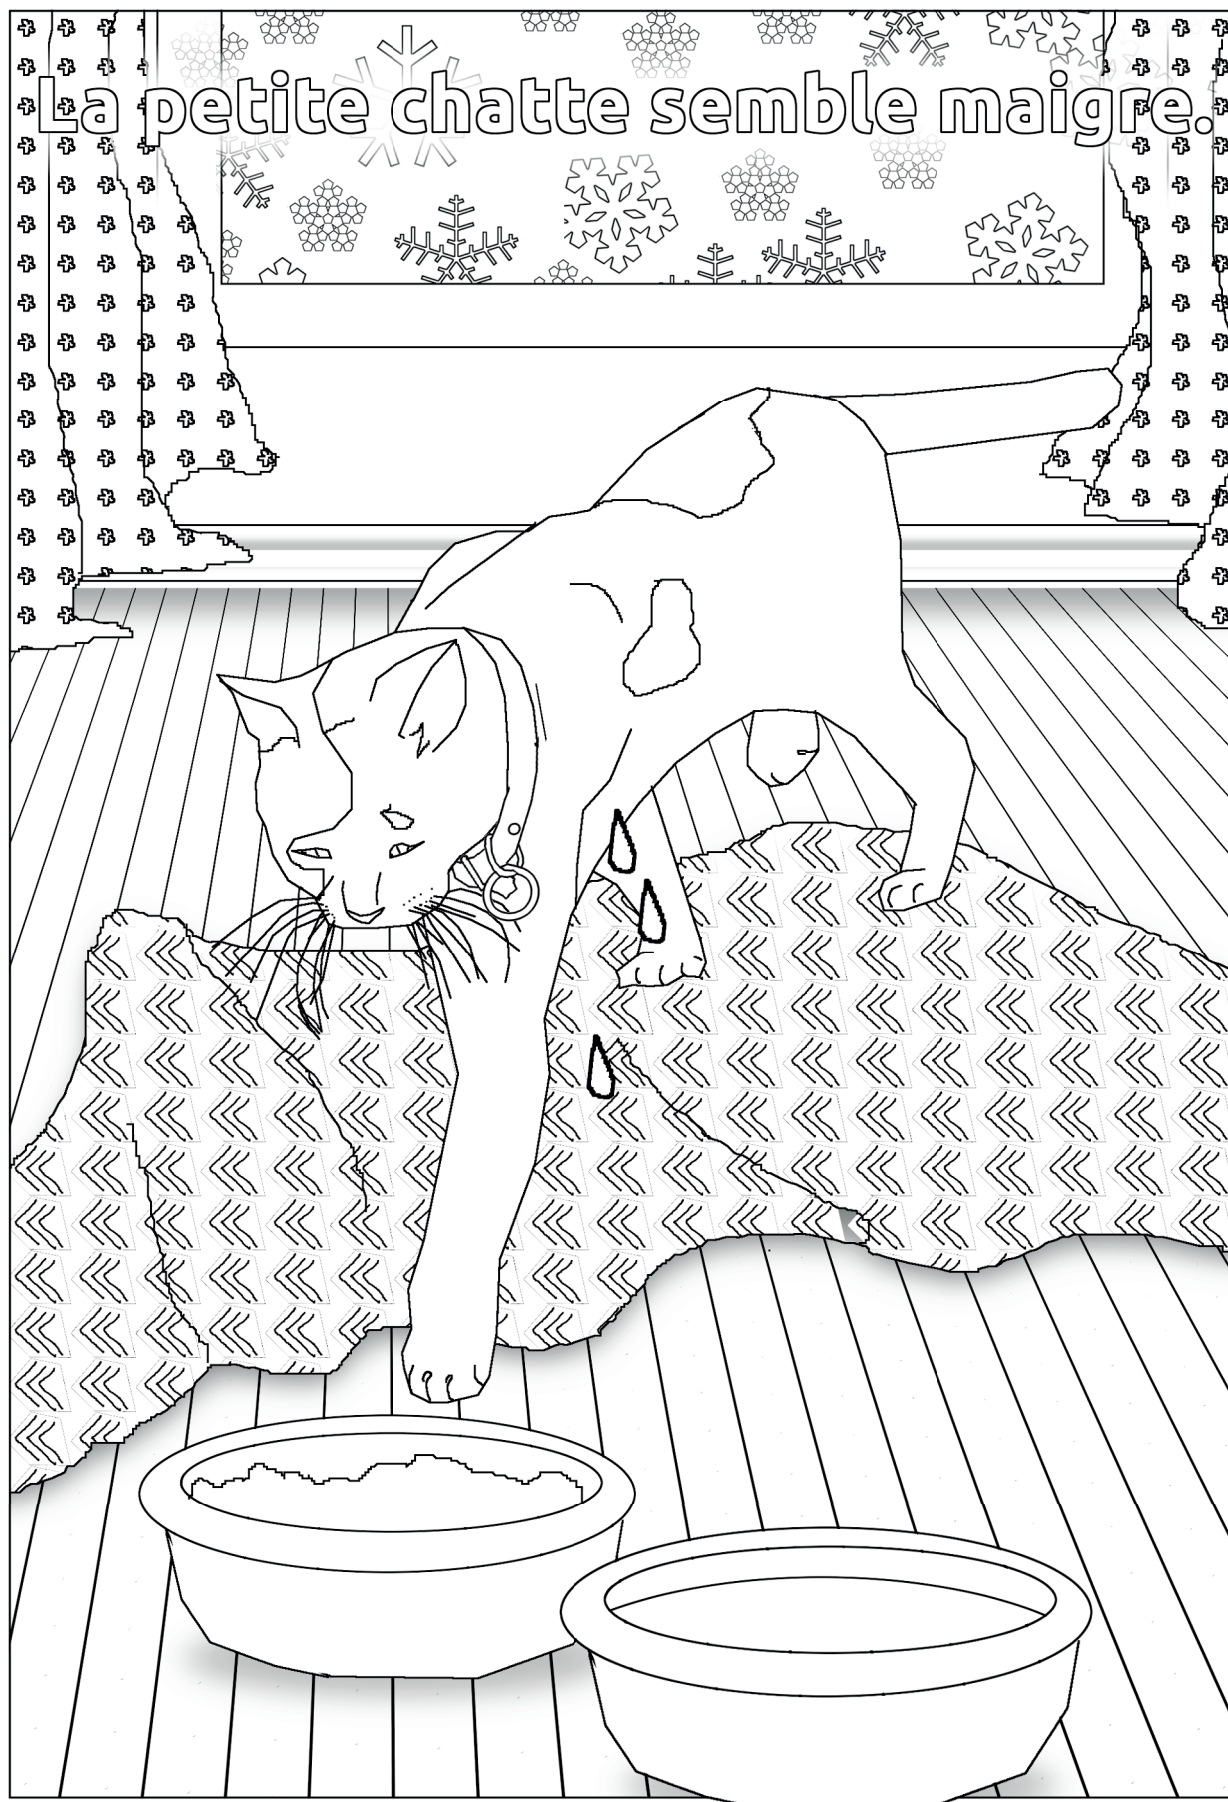

Elle a du givre sur son ventre
et les flocons sur ses moustaches
se transforment en eau.

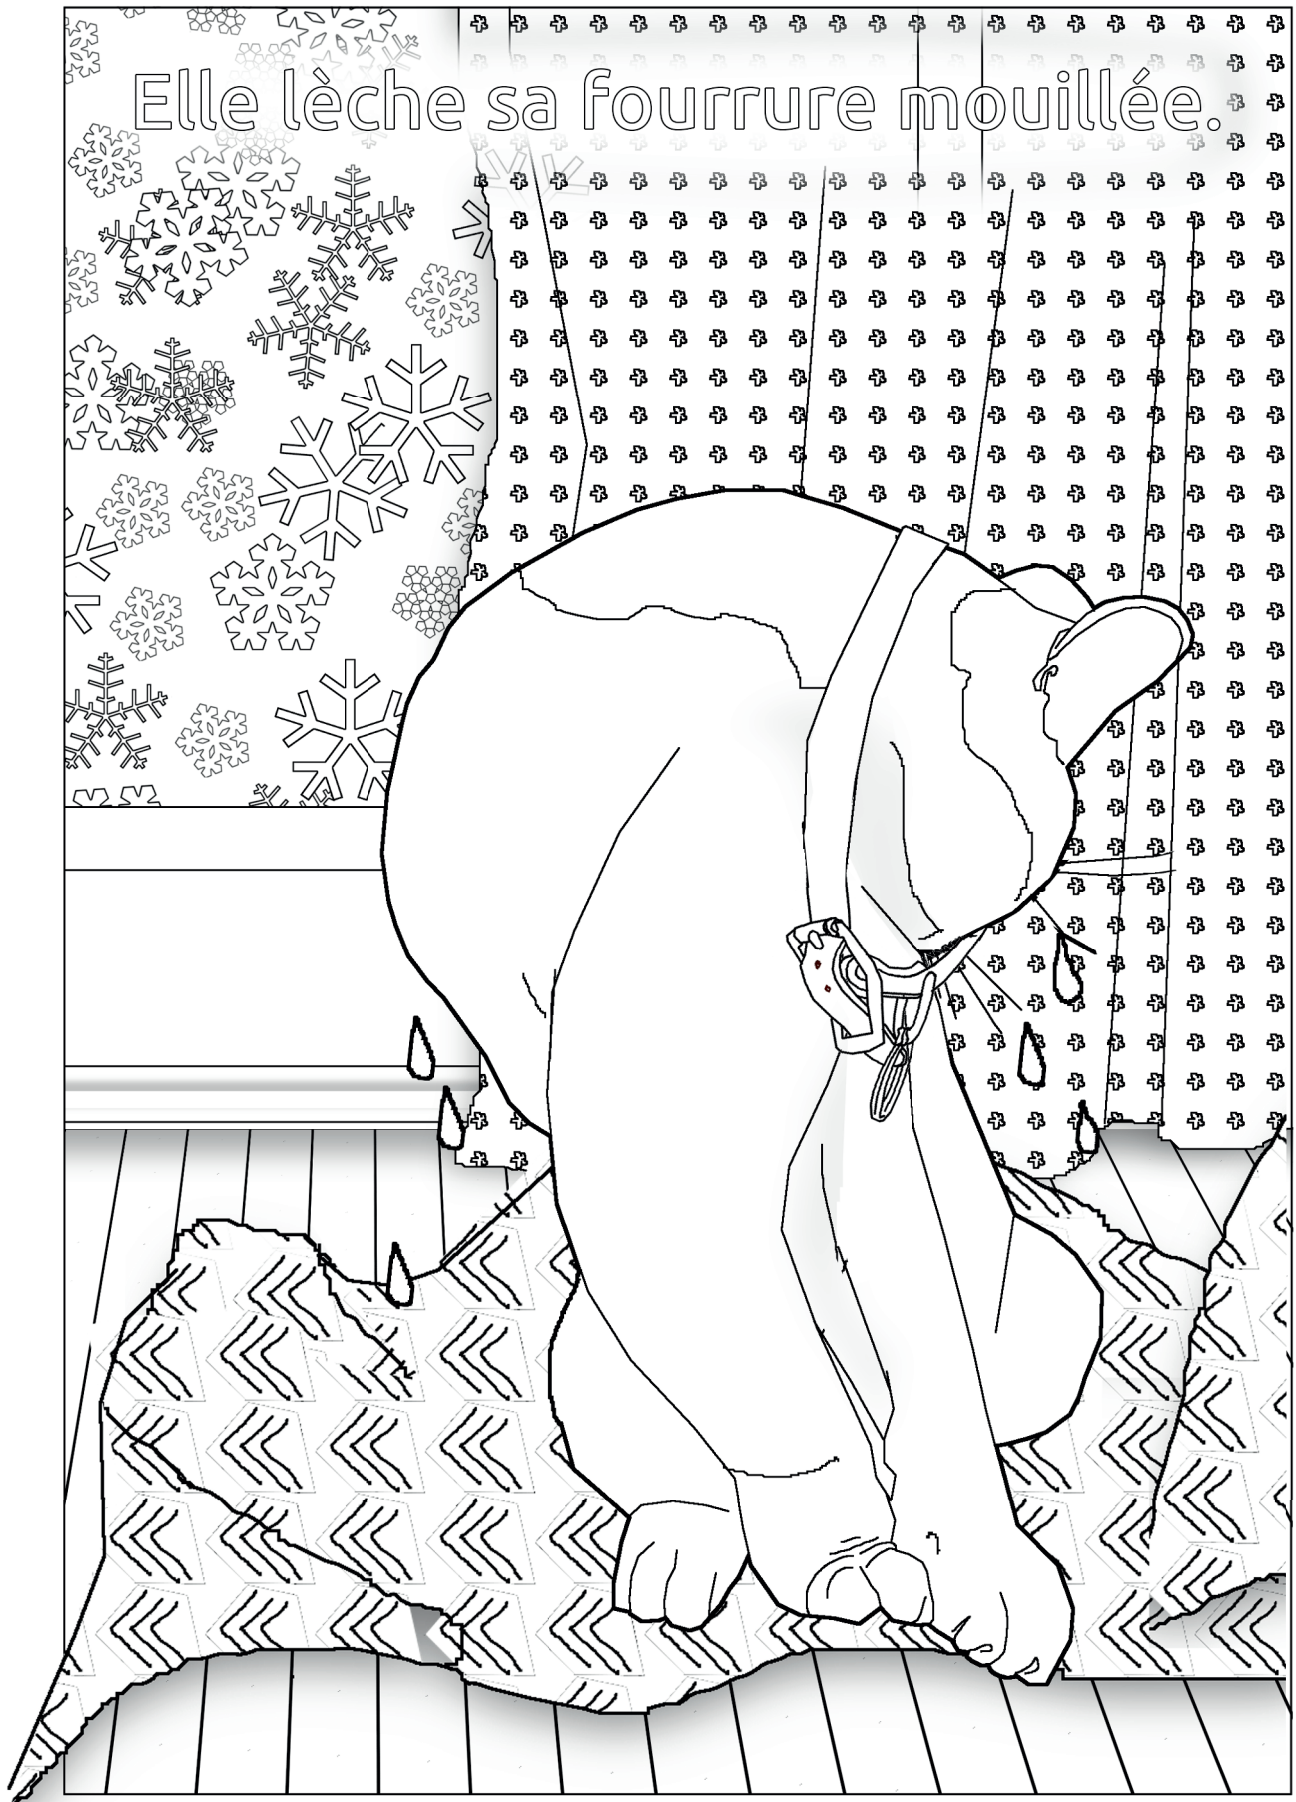

Elle avait mal tellement
elle avait froid.

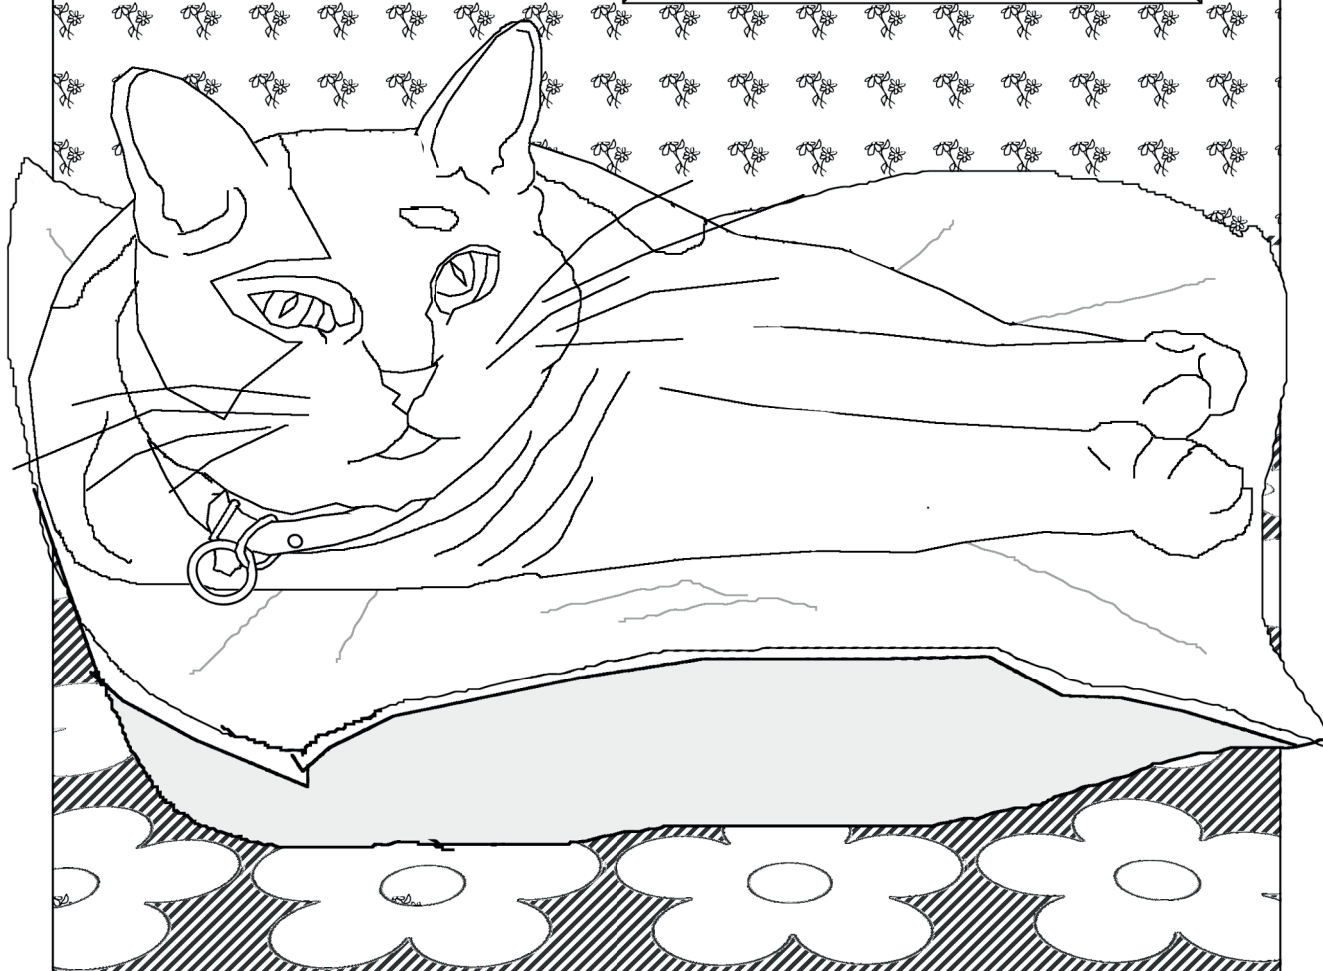

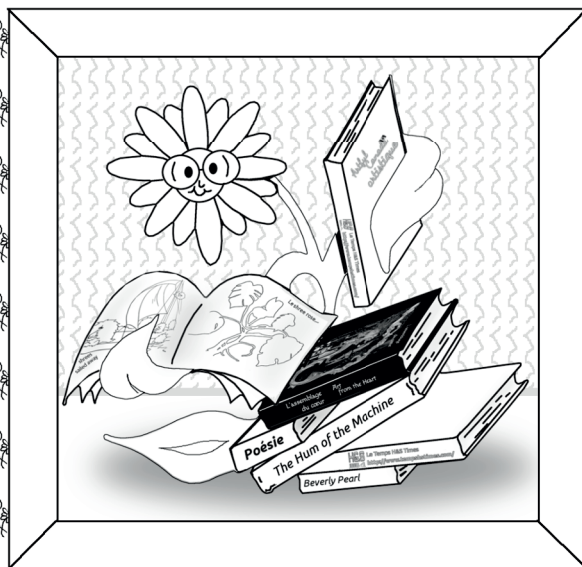

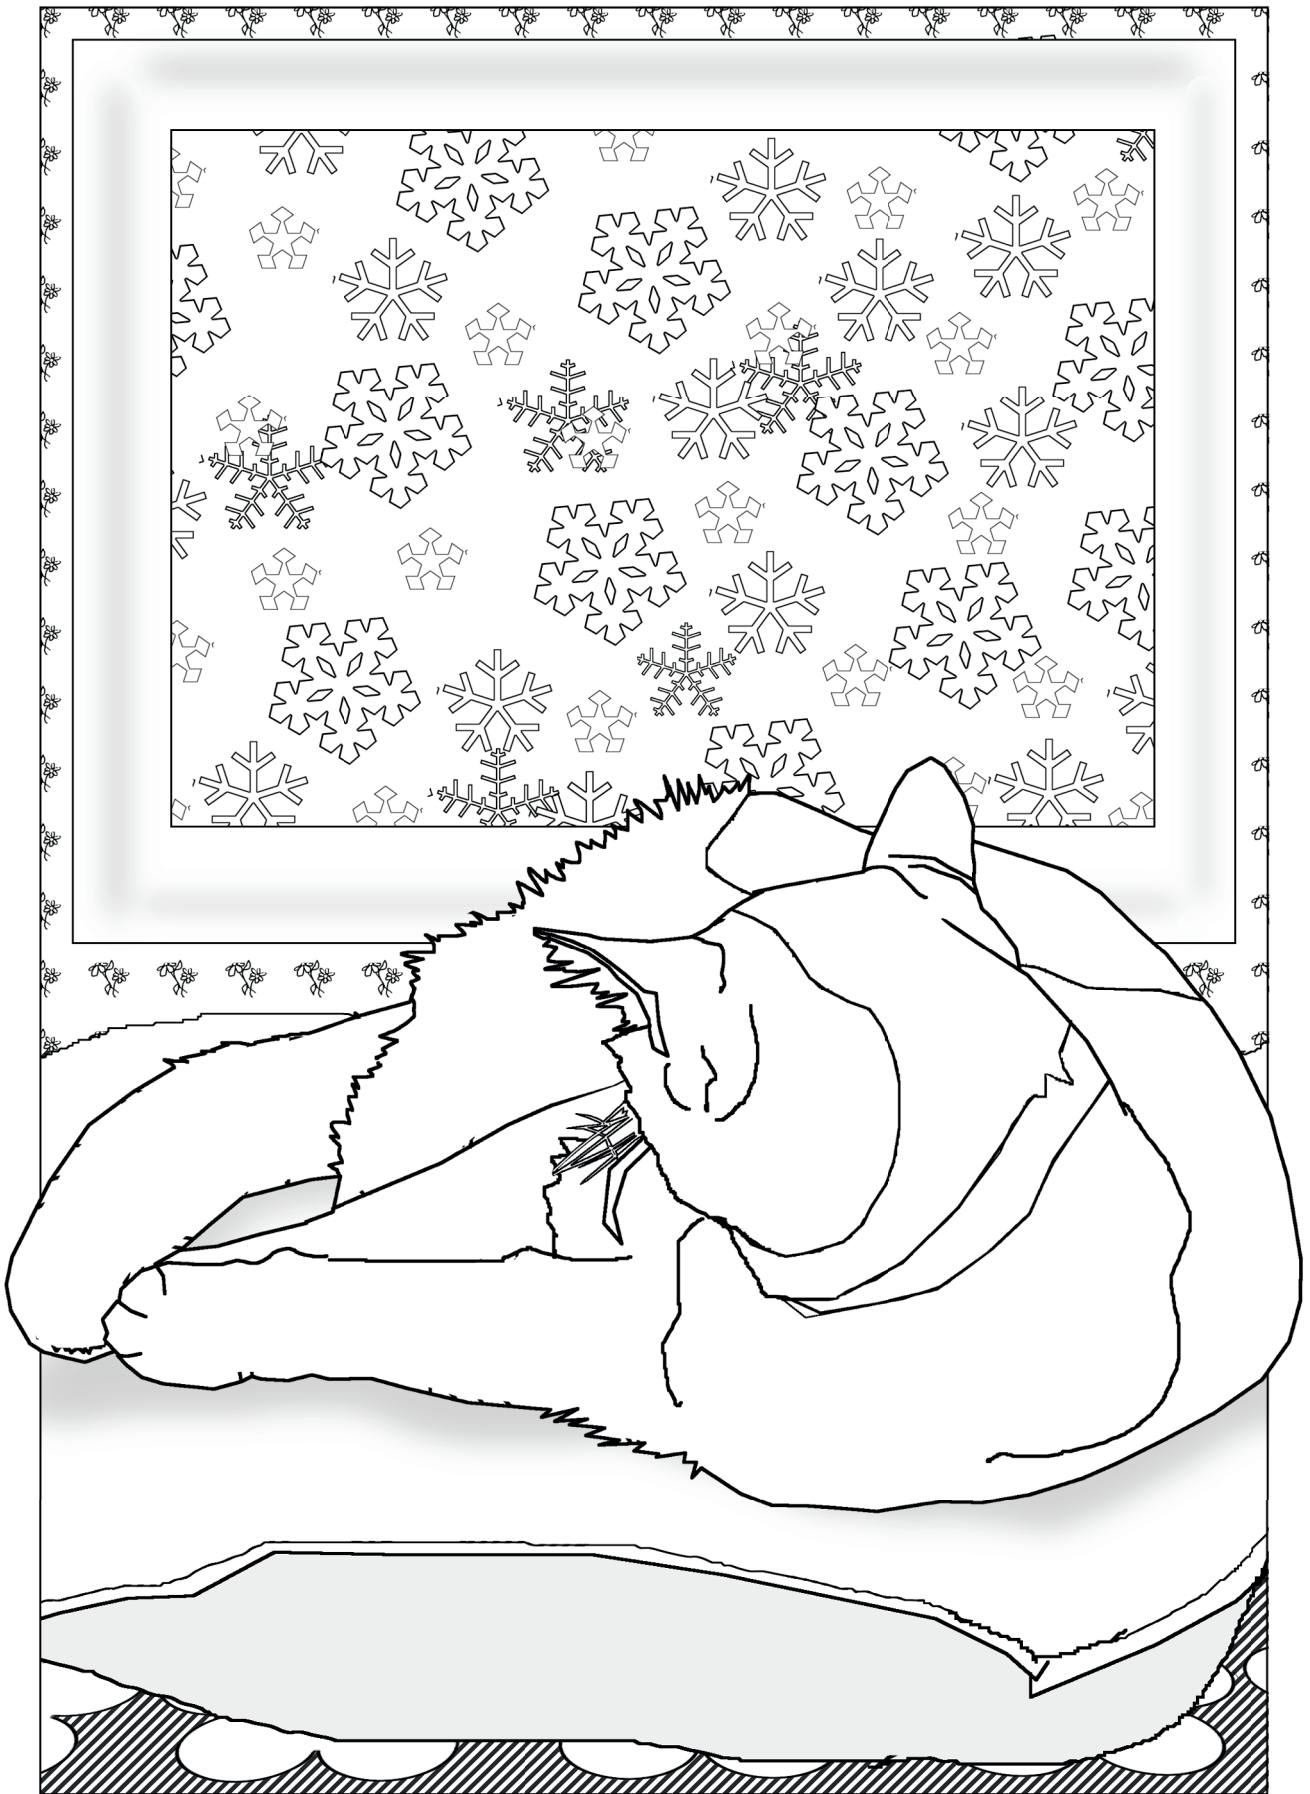

Elle lèche sa fourrure mouillée.

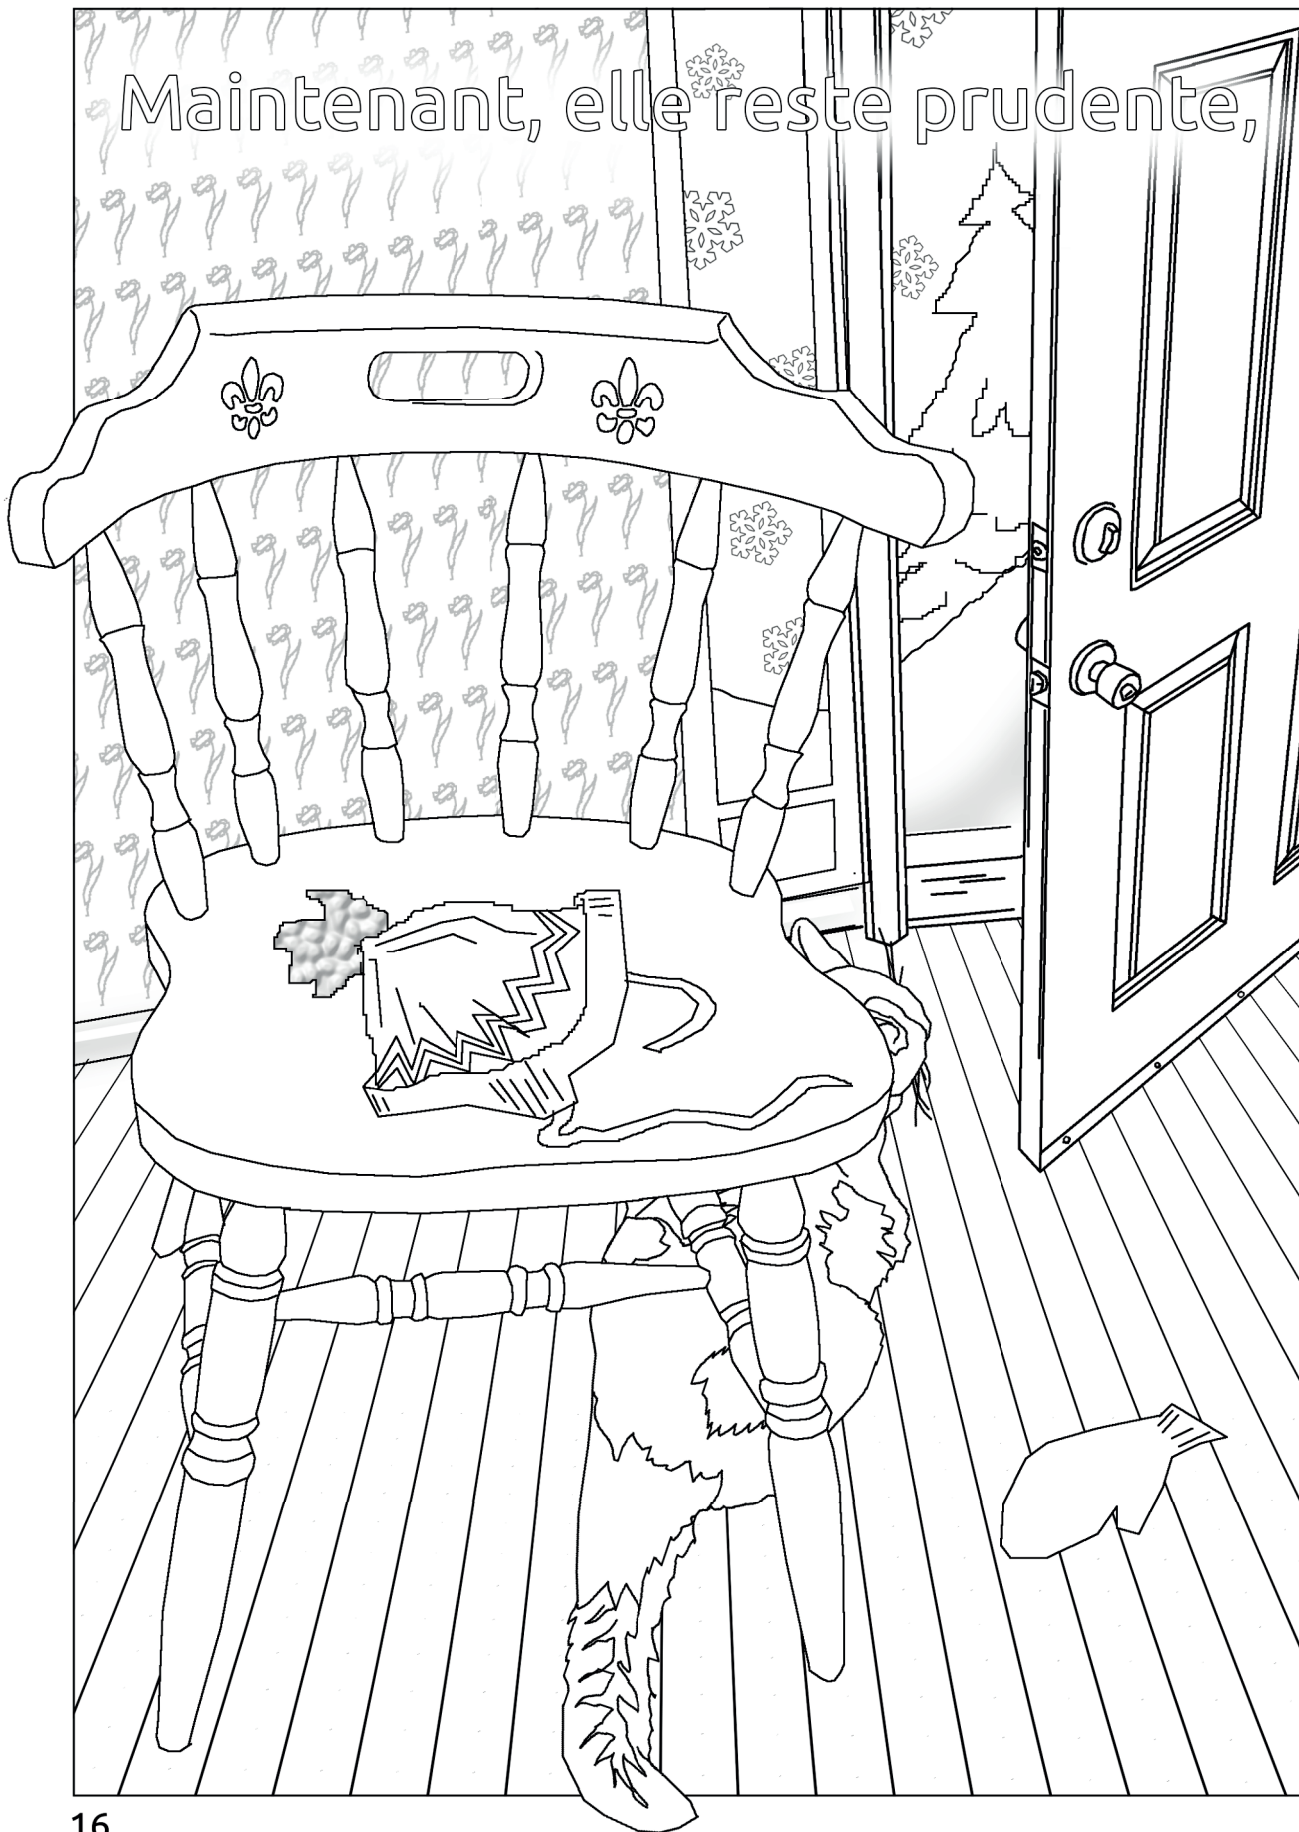

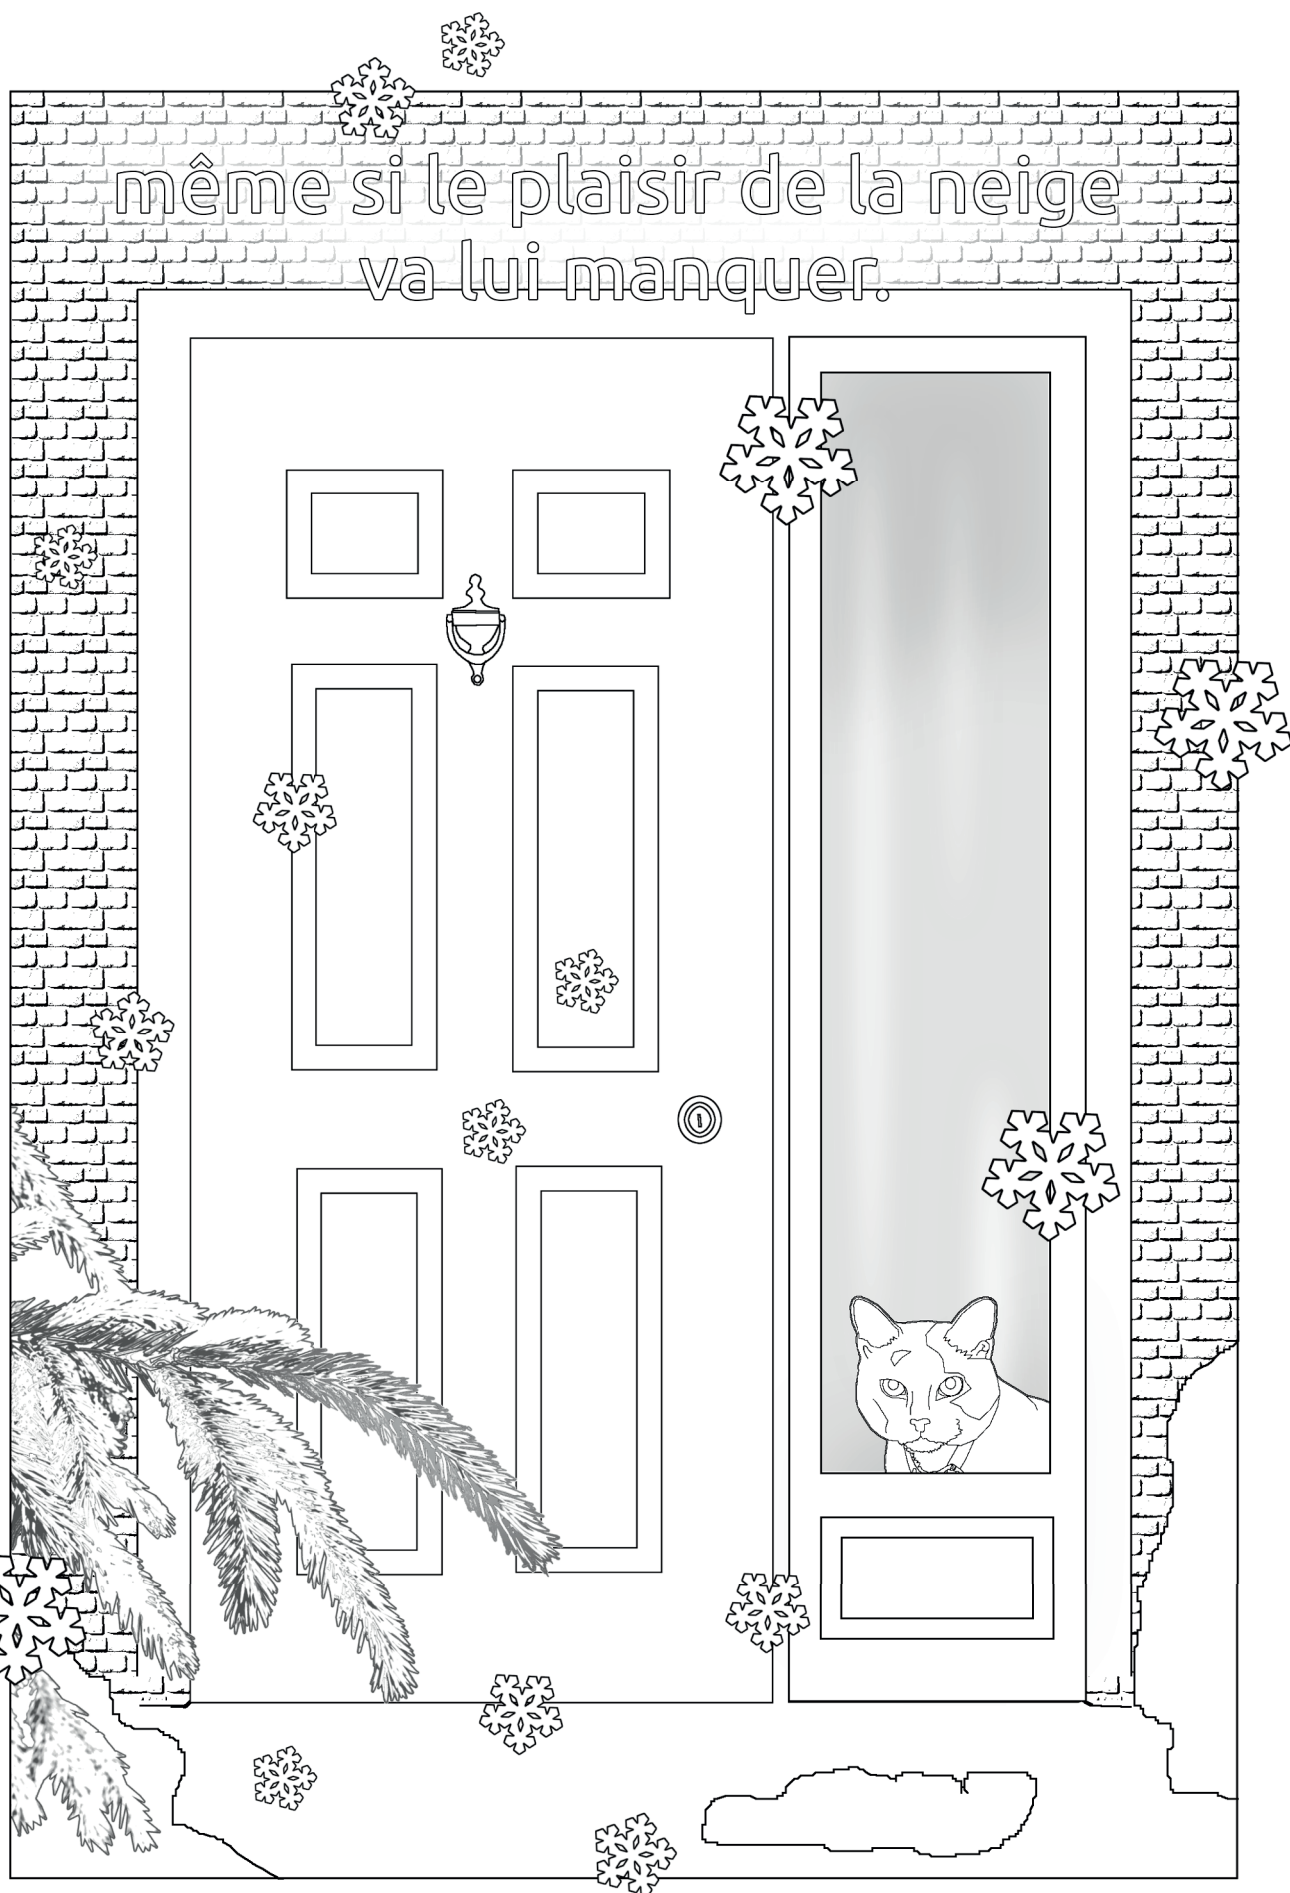

Plus chaleureuse déjà,
elle commence à ronronner.

Maintenant, elle reste prudente,

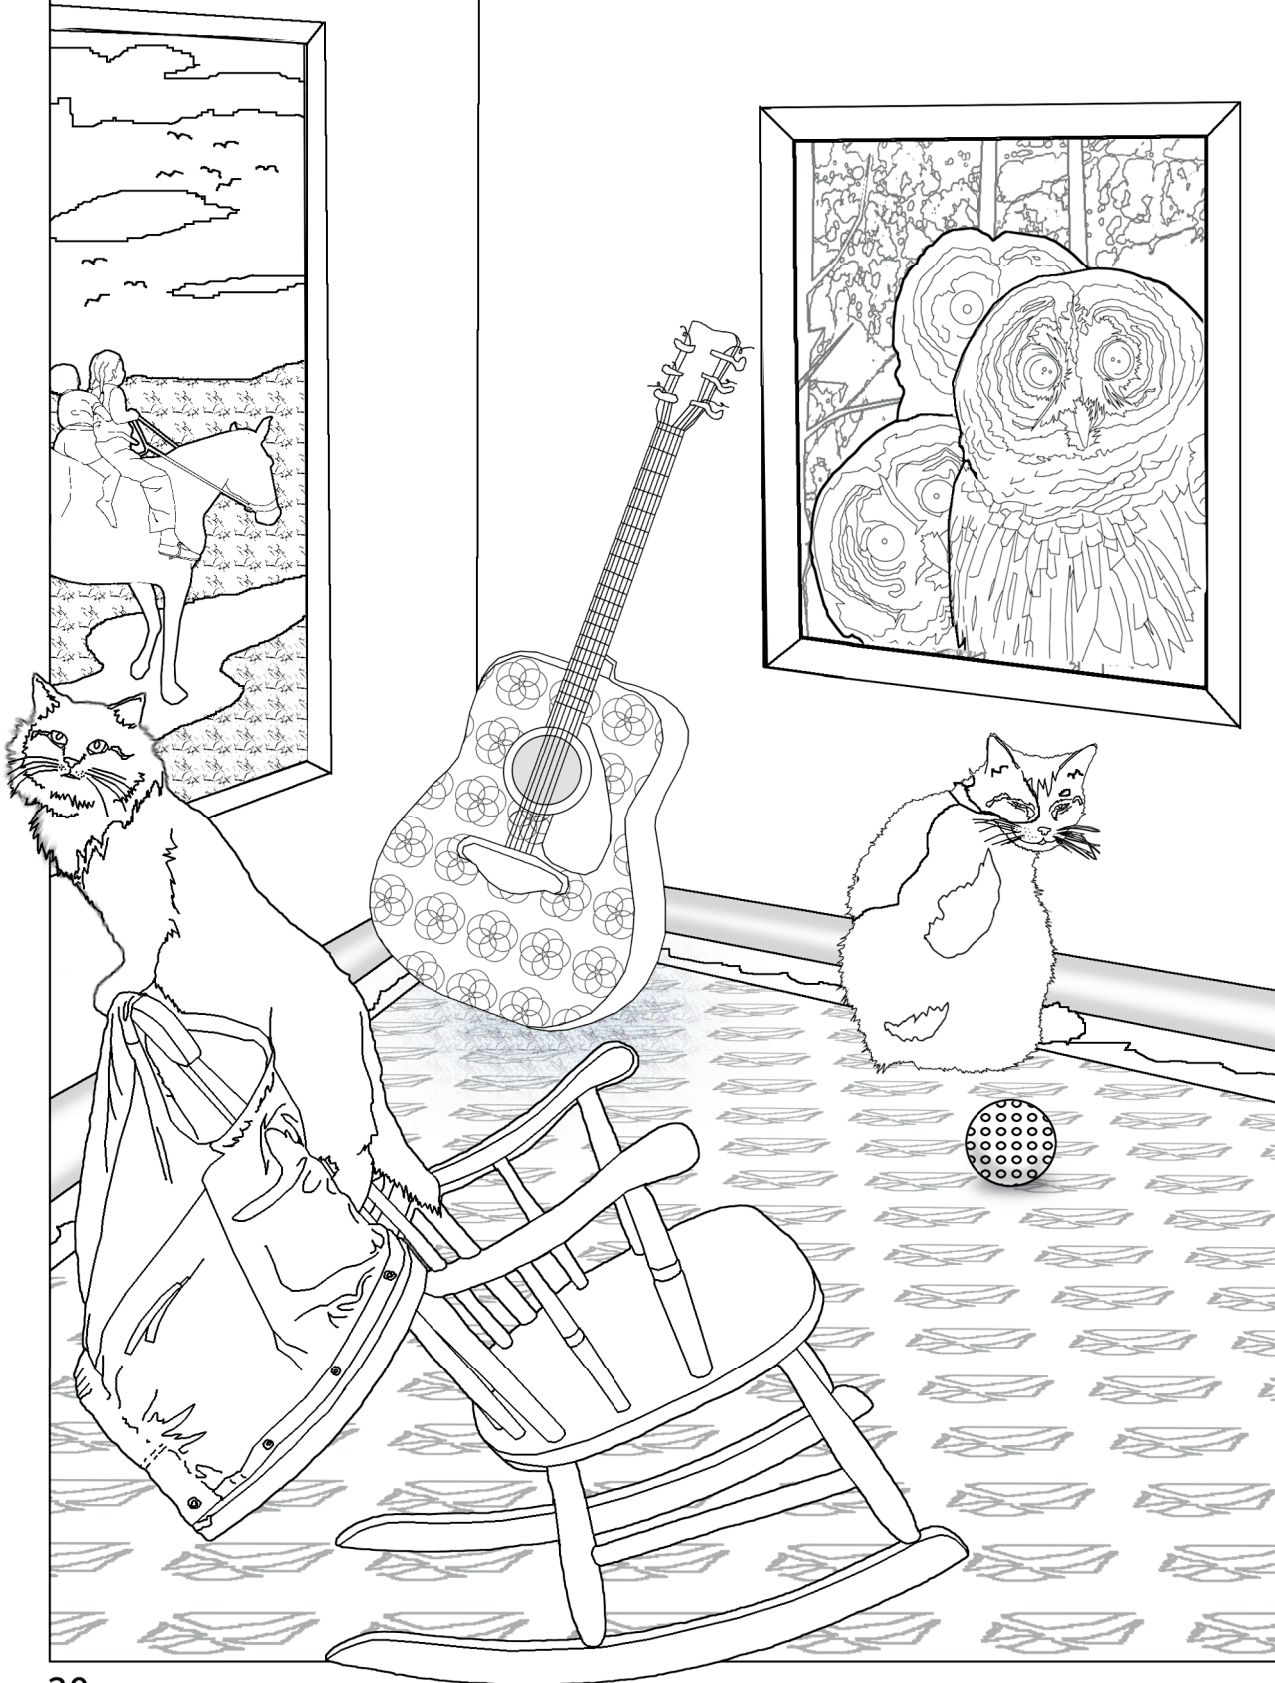

Sa mère ne sort
jamais de la maison.

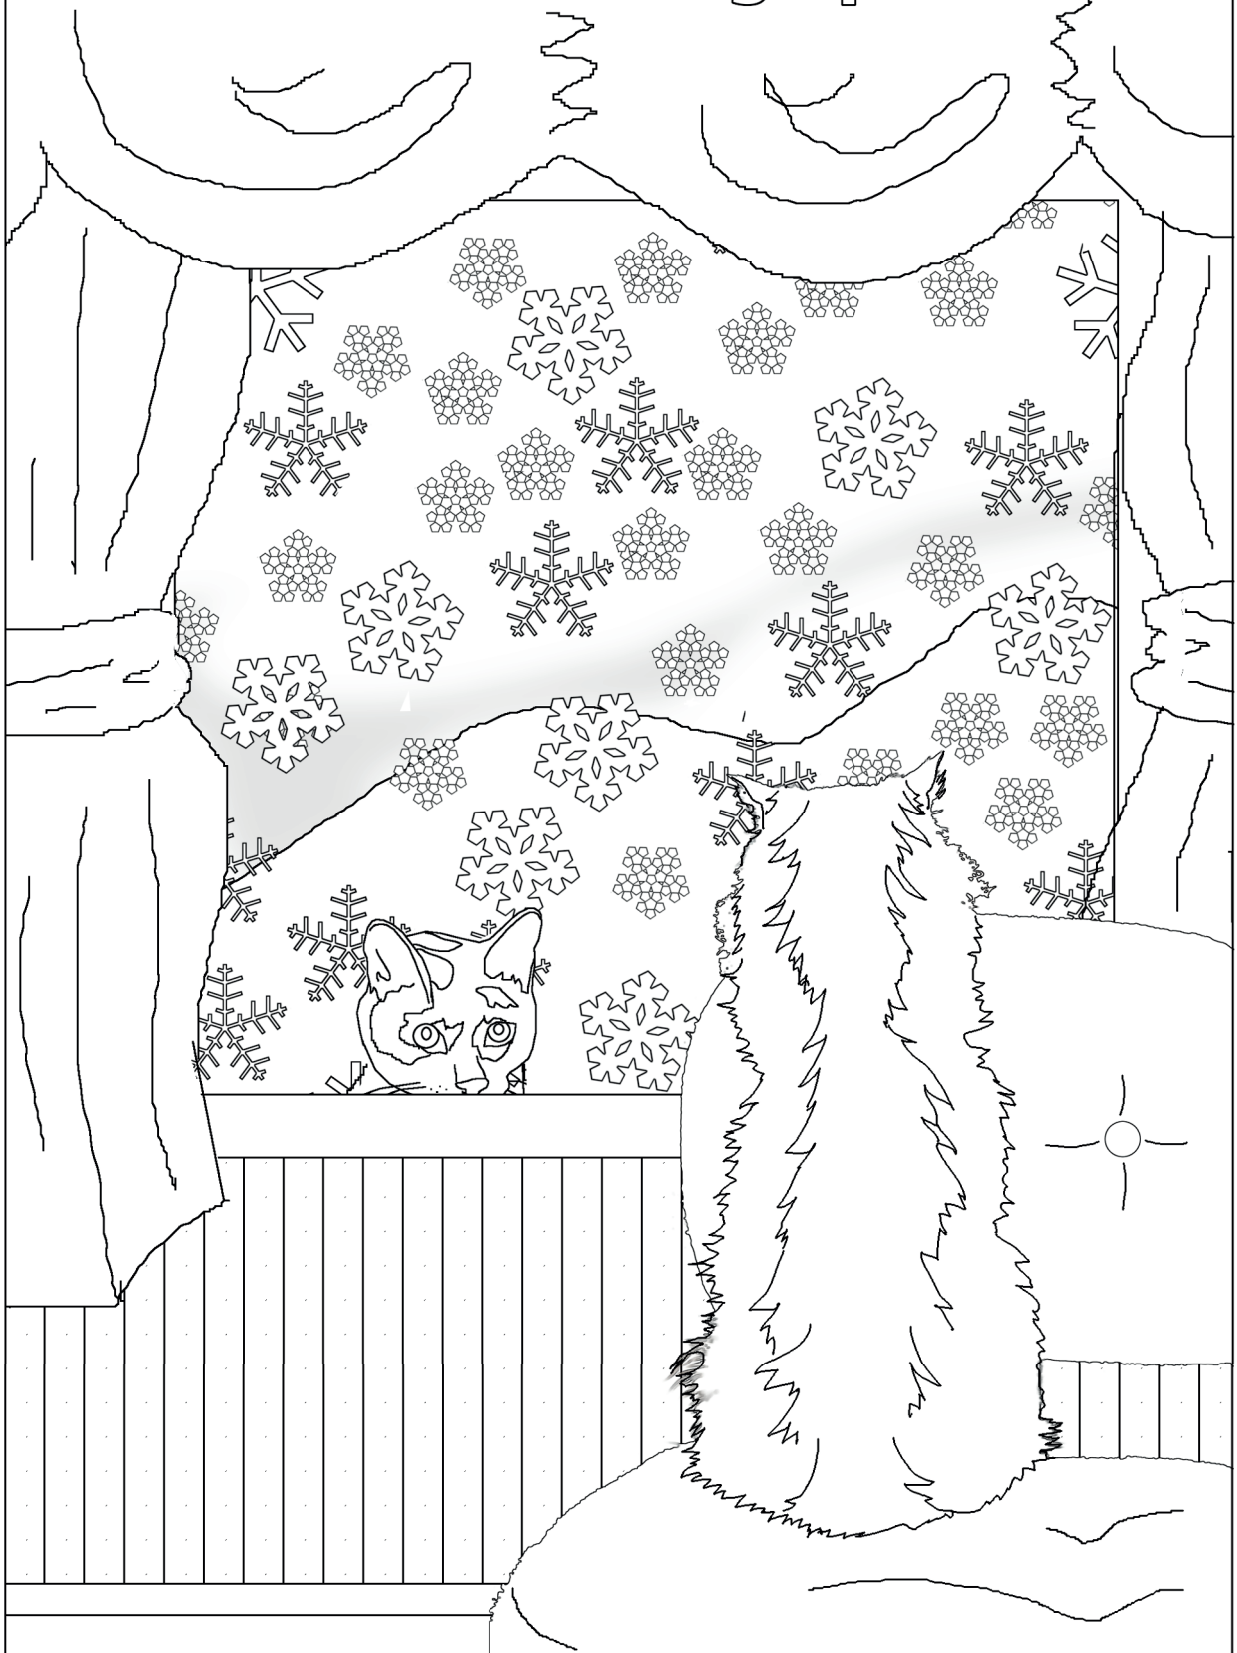

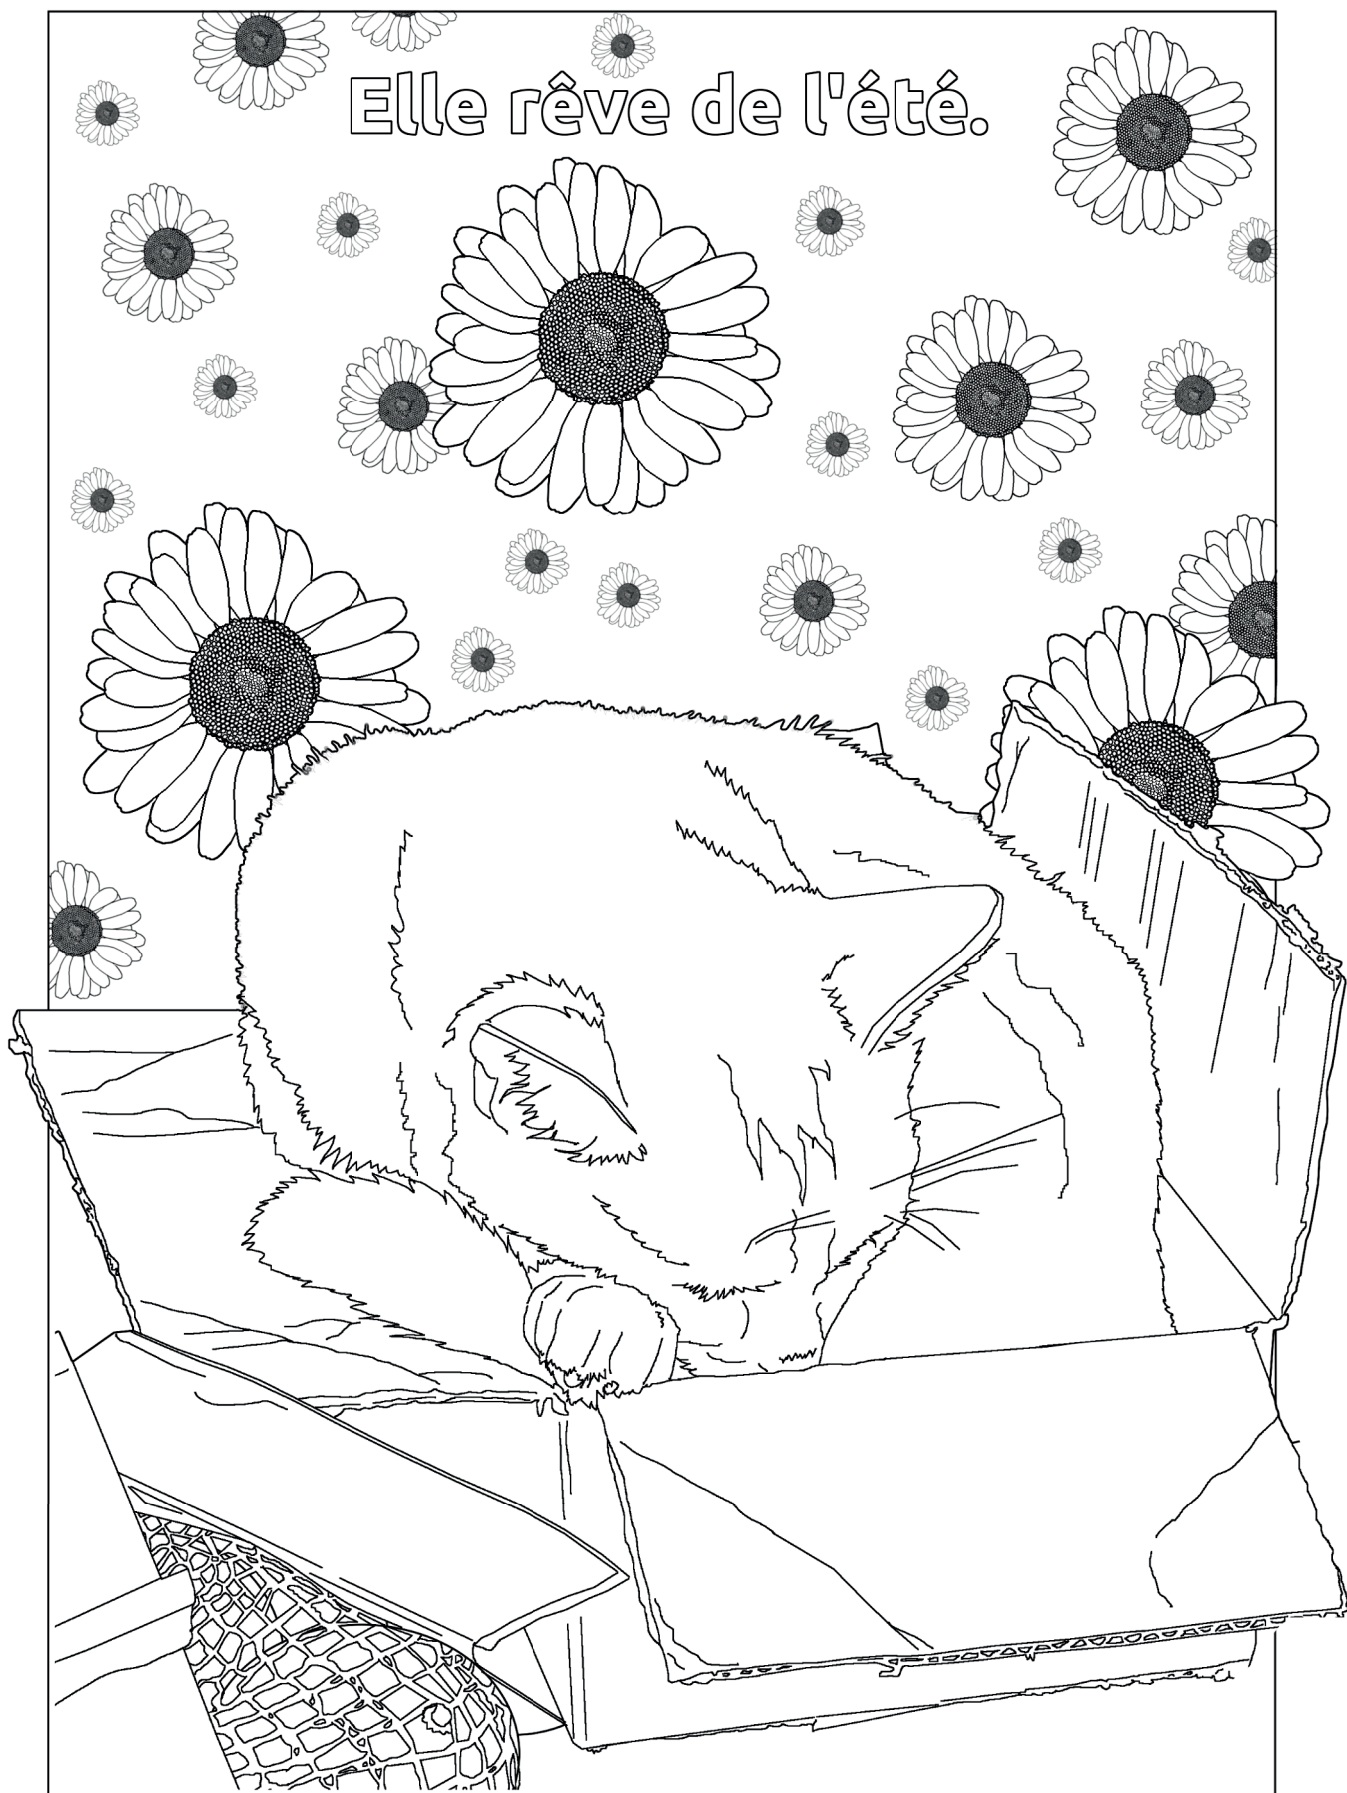

Elle joue à l'intérieur.

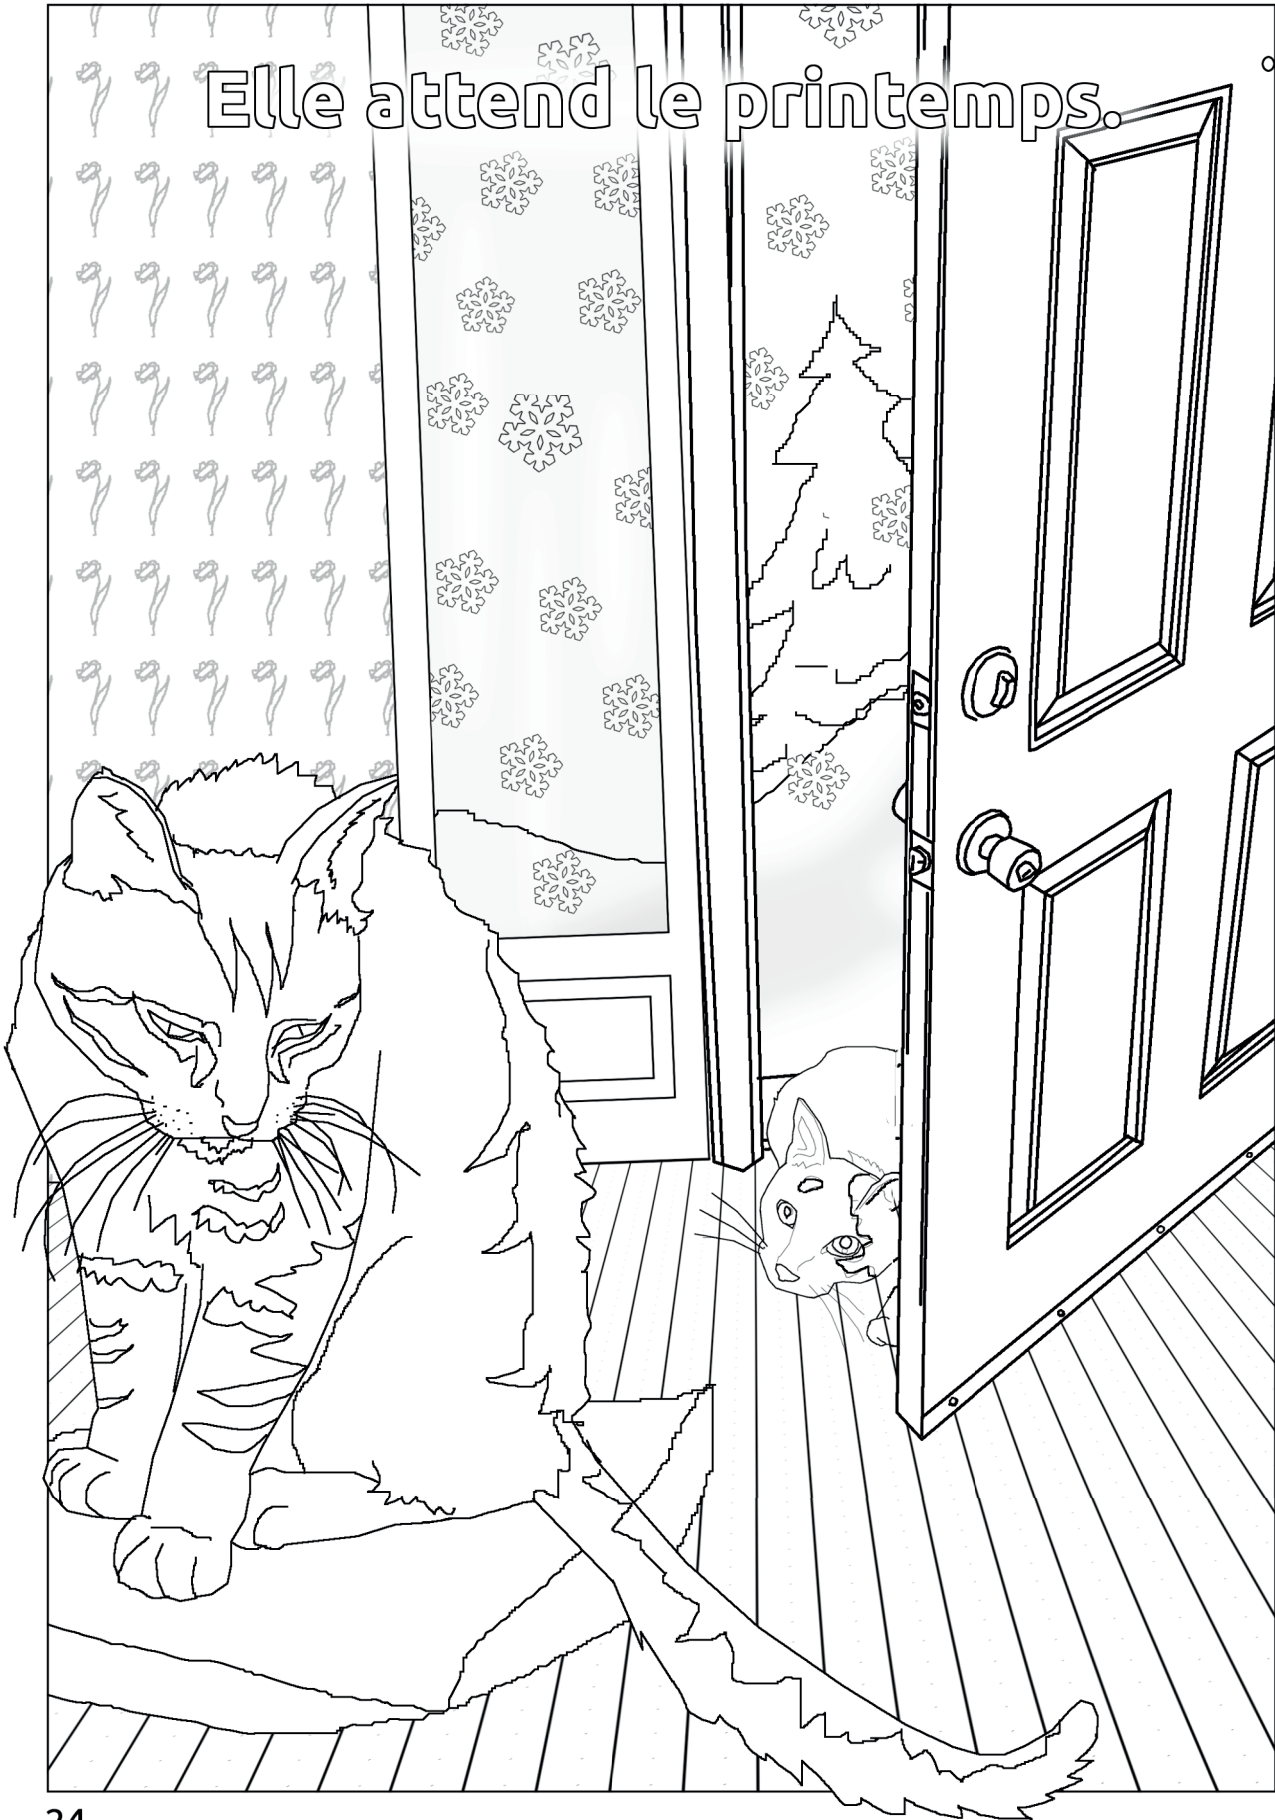

Maman évite la neige profonde.

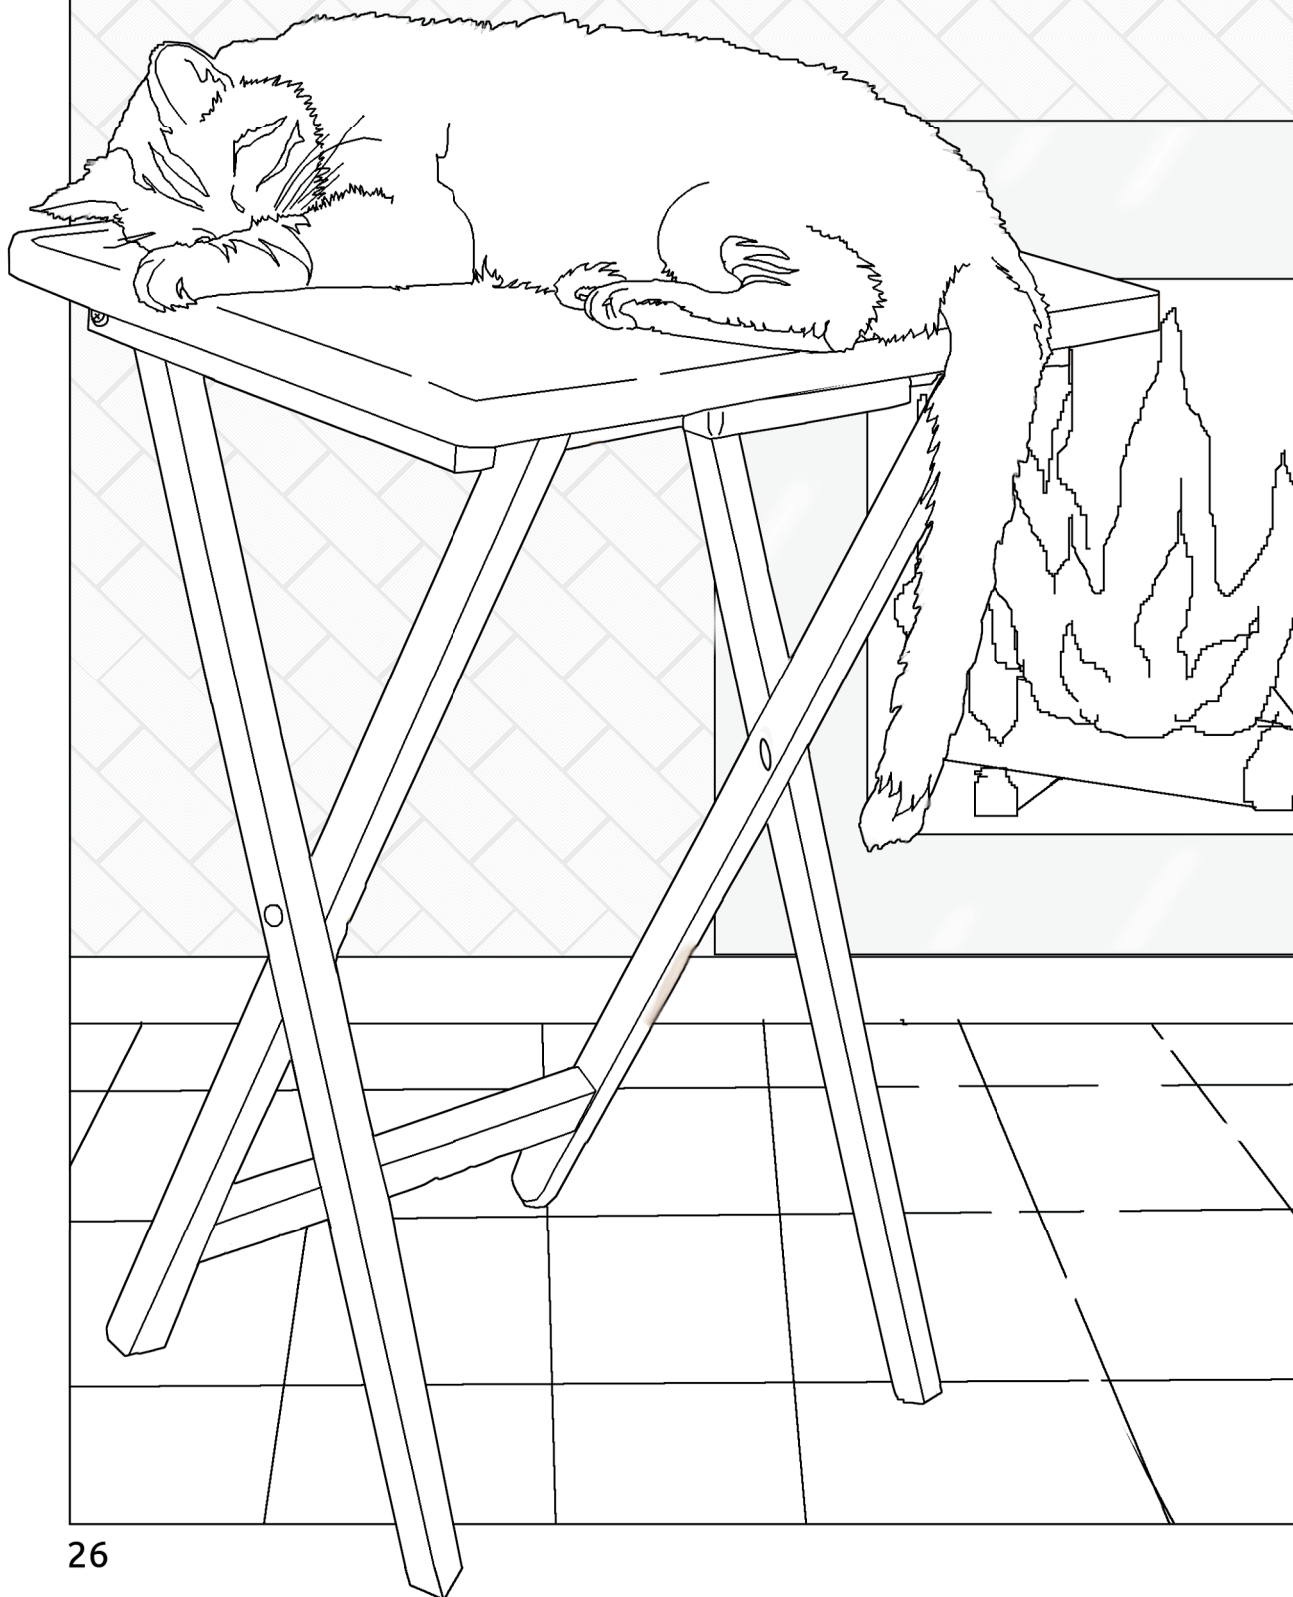

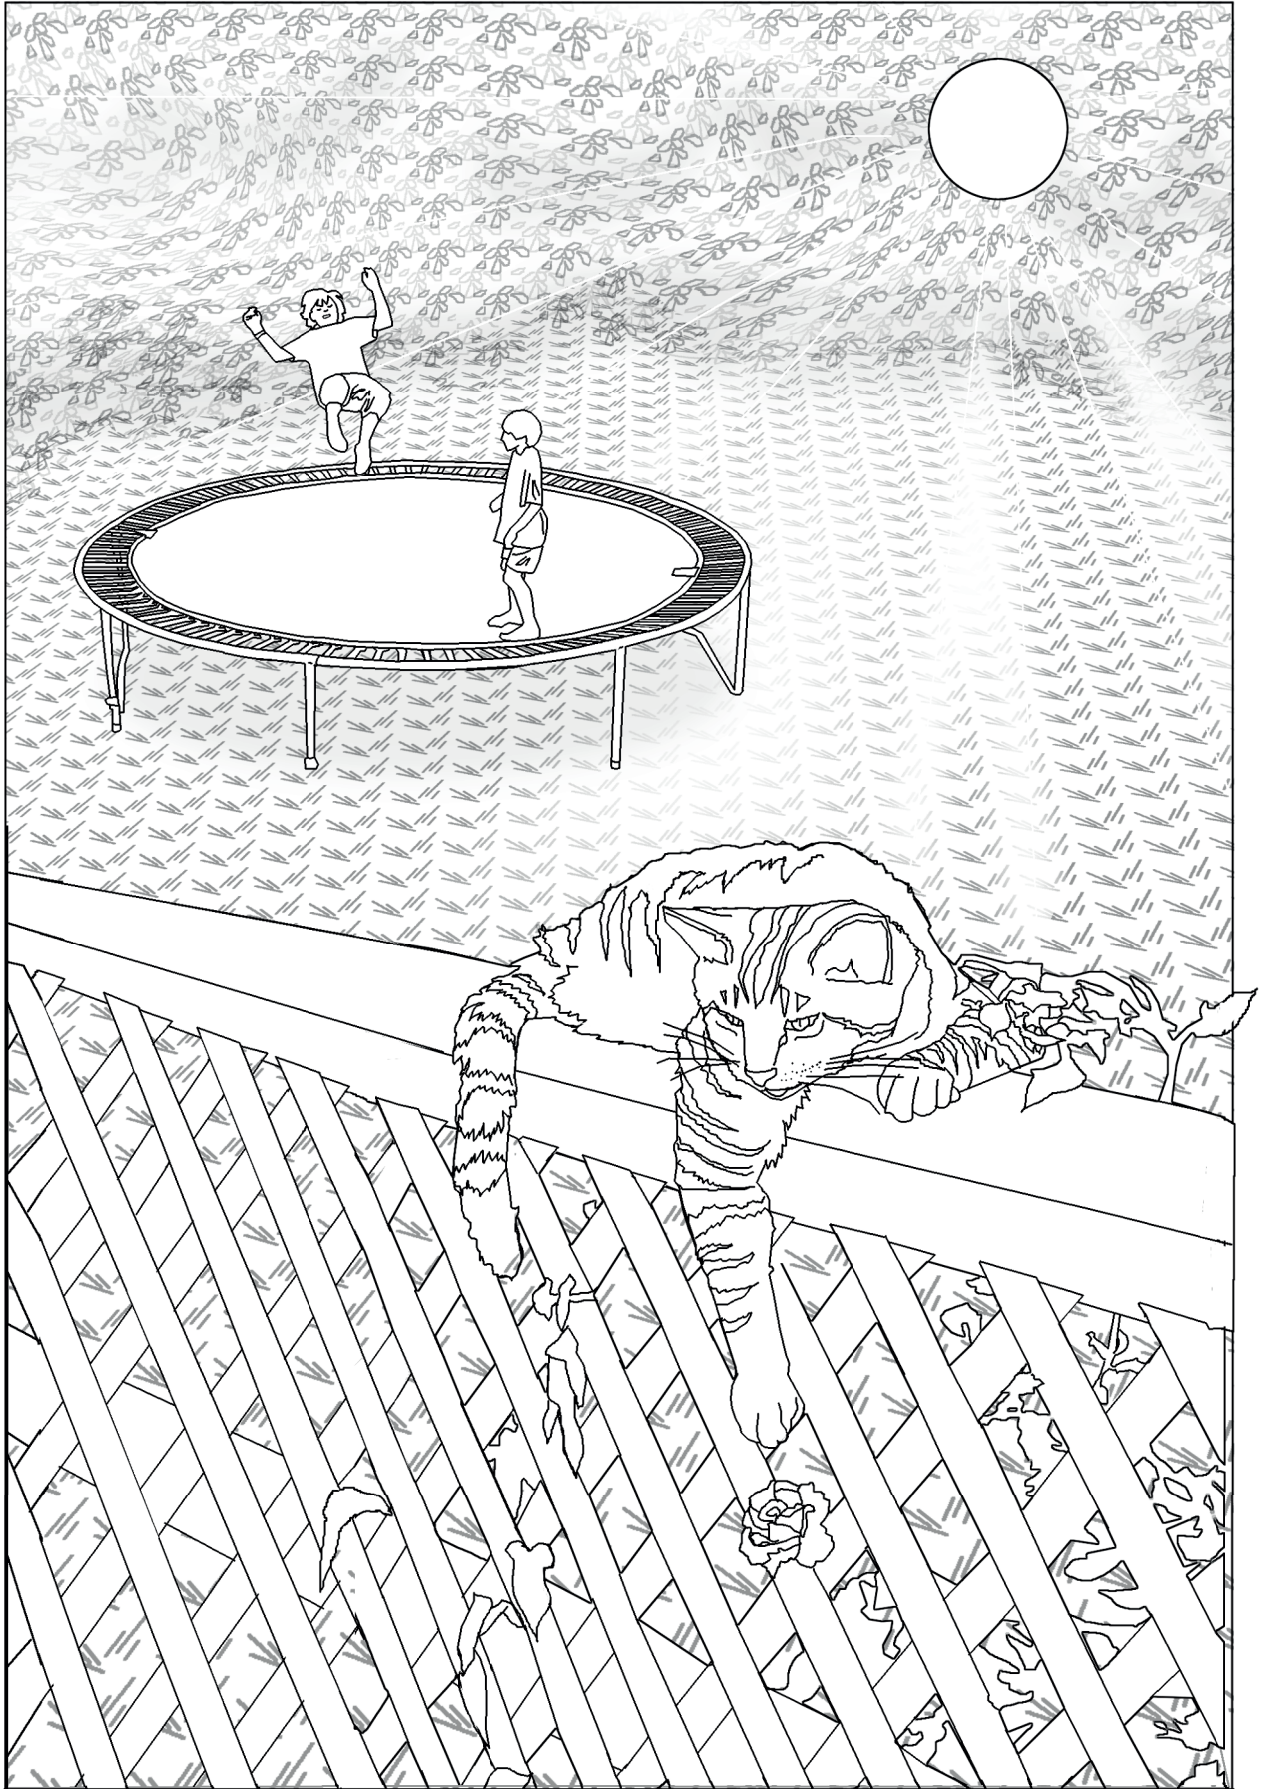

Elle attend le printemps.

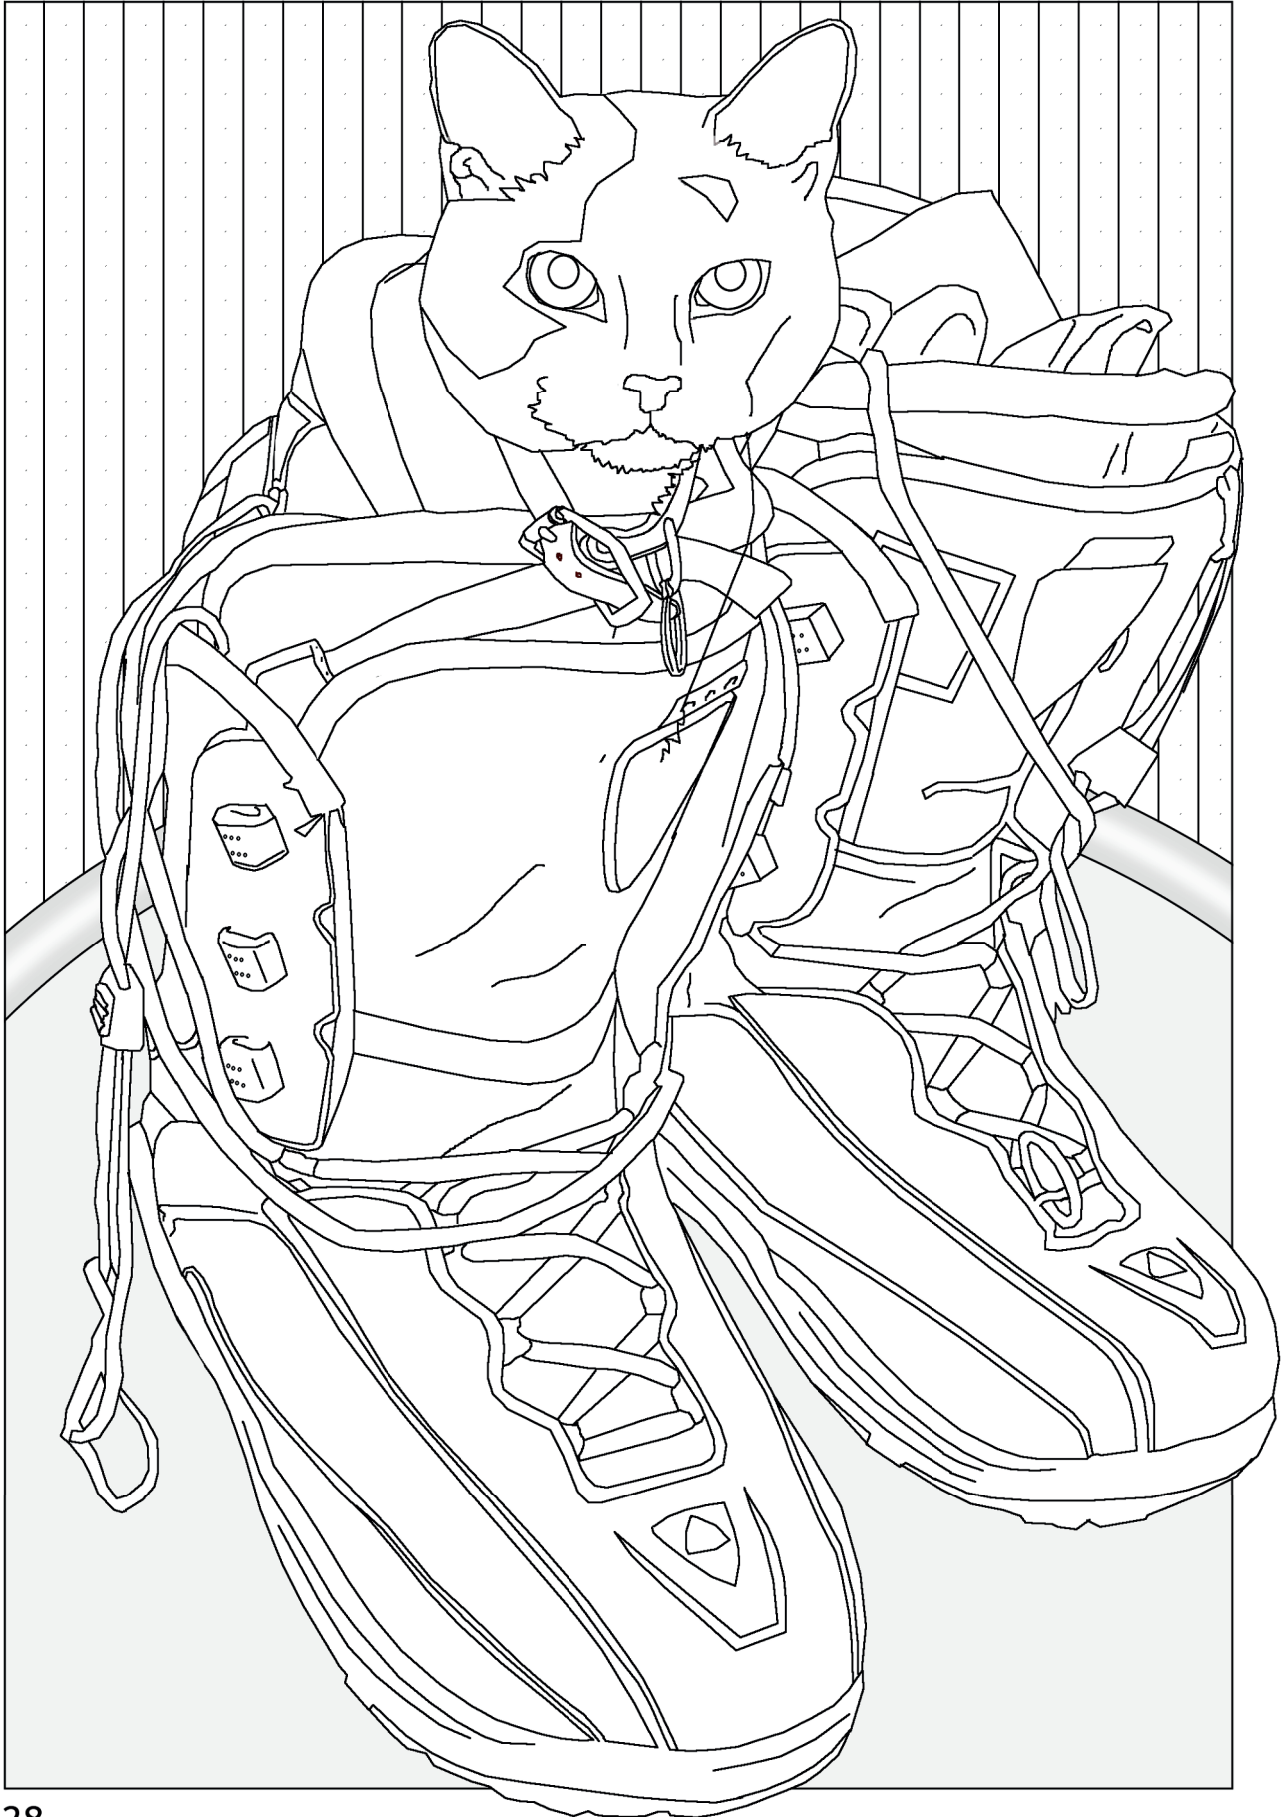

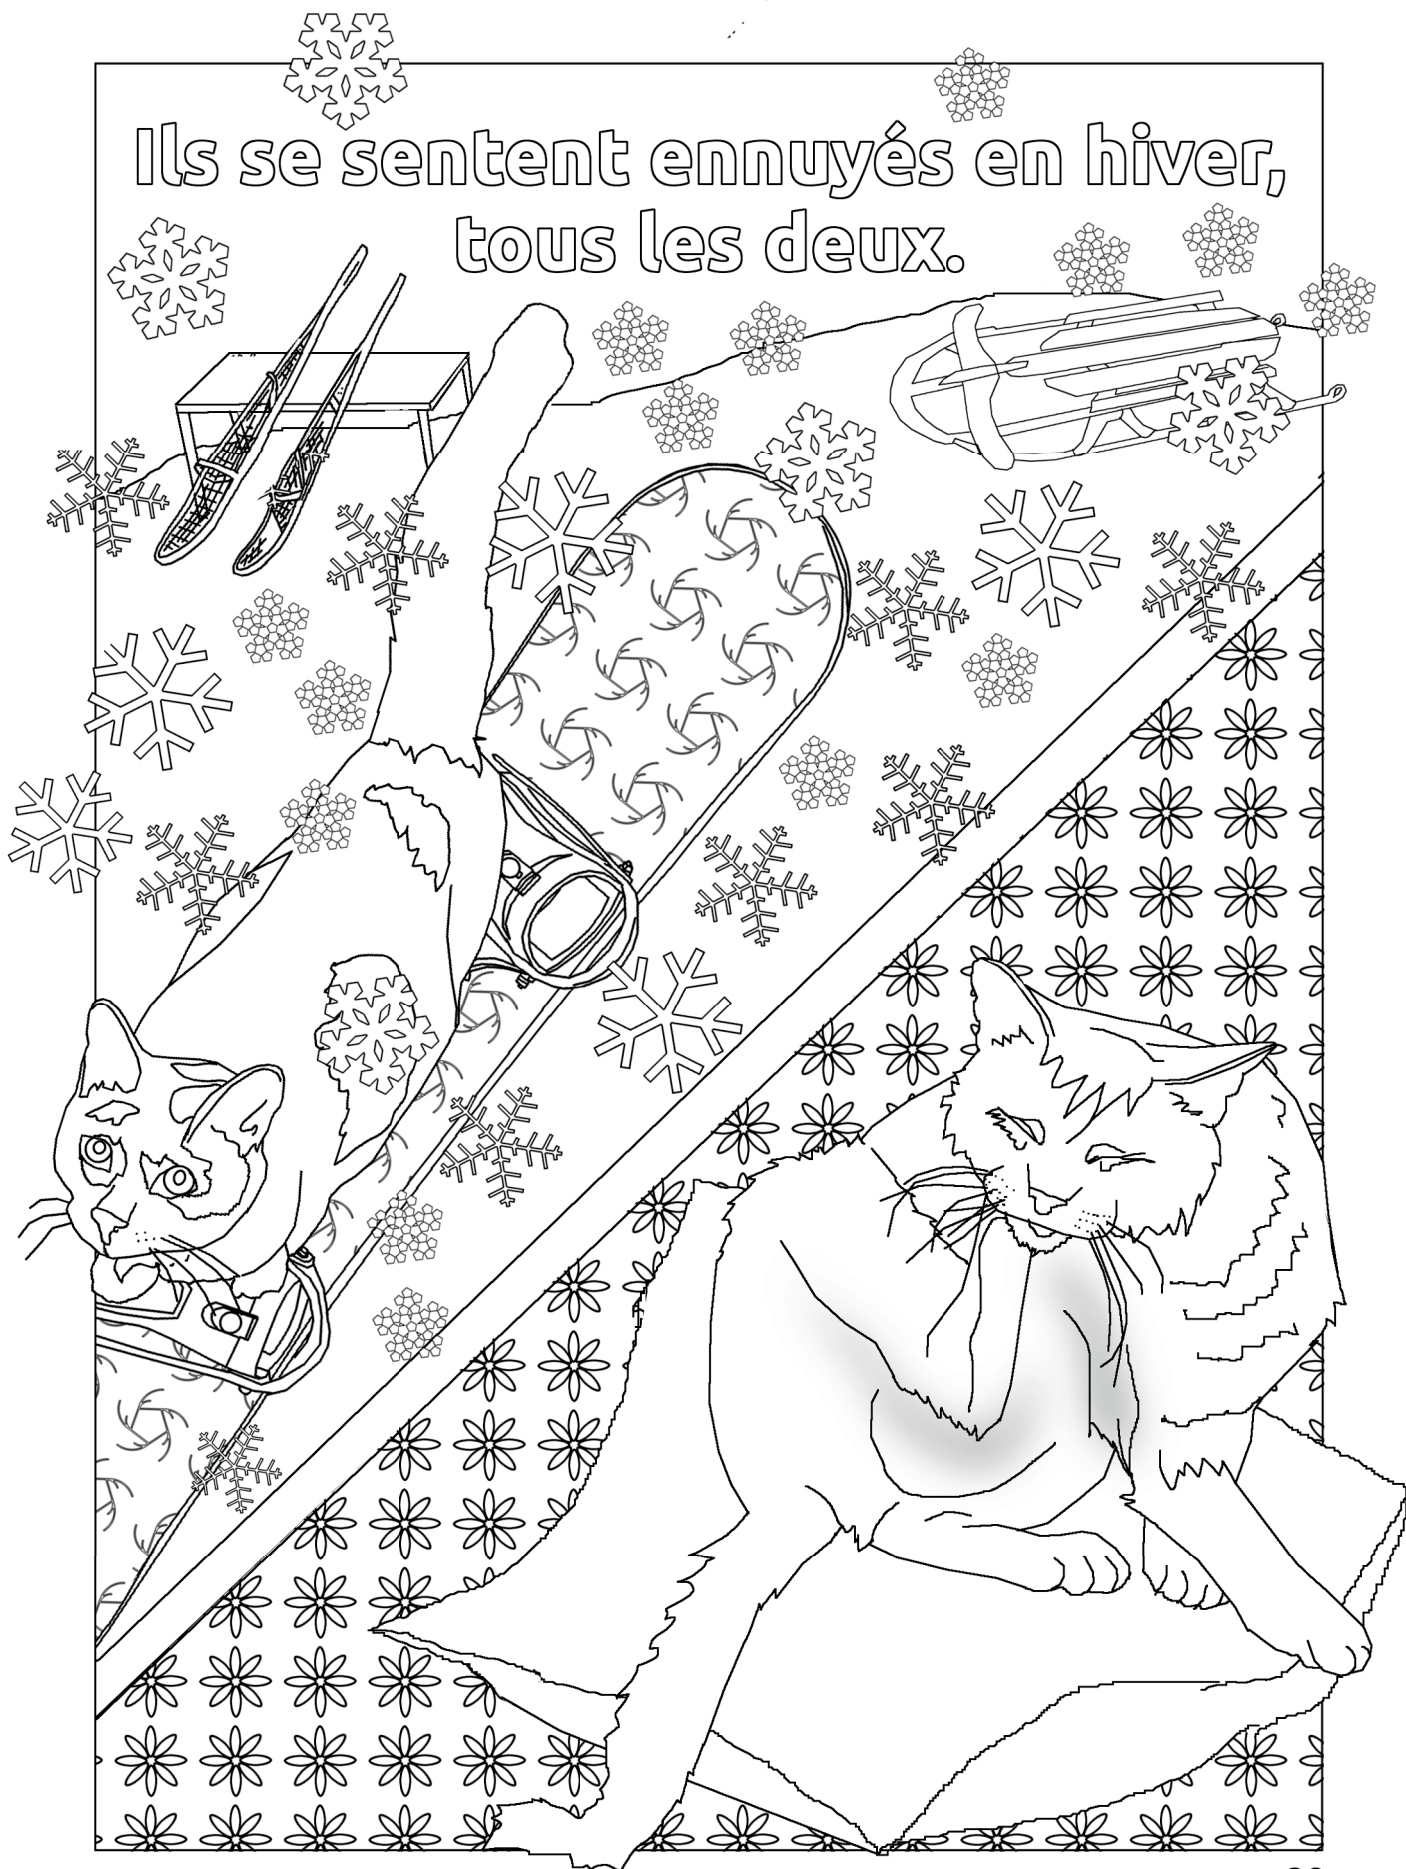

A côté du feu, elle peut
prétendre que l'été est arrivé.

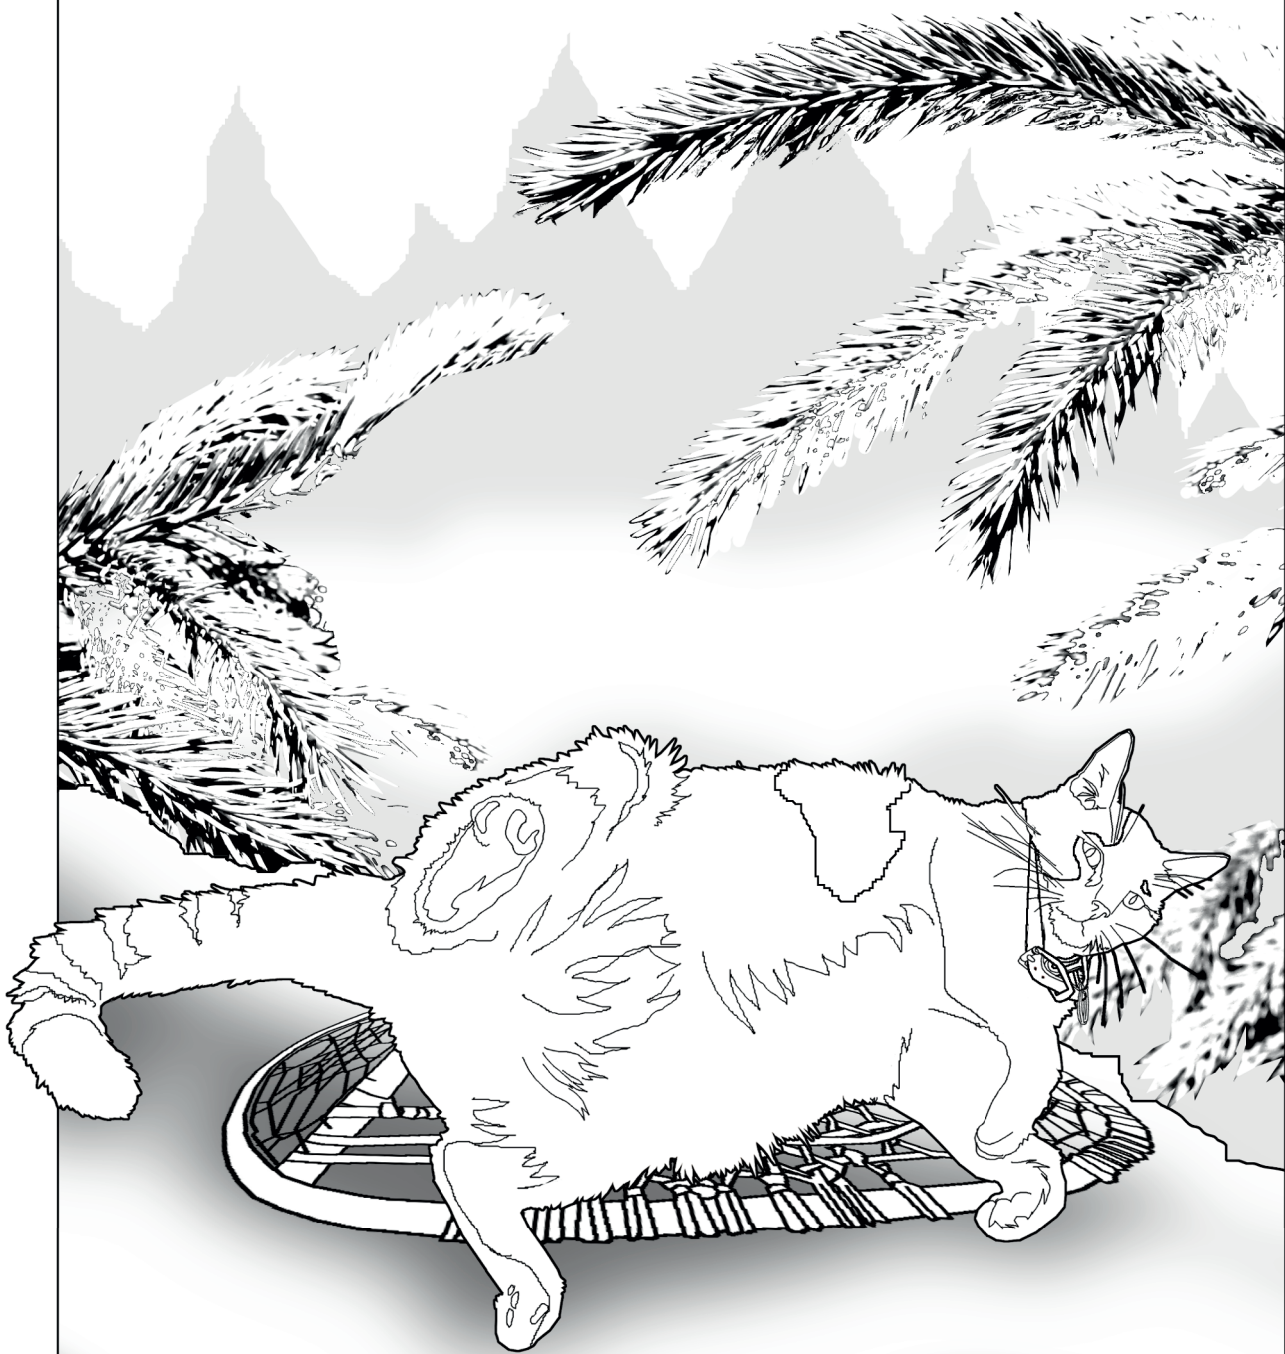

Les petites raquettes de chats
vont les aider !
